The numerical treatment of partial differential equations with particle methods and meshfree discretization techniques is an extremely active research field, both in the mathematics and engineering communities. Meshfree methods are becoming increasingly mainstream in various applications. Due to their independence of a mesh, particle schemes and meshfree methods can deal with large geometric changes of the domain more easily than classical discretization techniques. Furthermore, meshfree methods offer a promising approach for the coupling of particle models to continuous models. This volume of LNCSE is a collection of the papers from the proceedings of the Fifth International Workshop on Meshfree Methods, held in Bonn in August 2009. The articles address the different meshfree methods and their use in applied mathematics, physics and engineering. The volume is intended to foster this highly active and exciting area of interdisciplinary research and to present recent advances and findings in this field.

Emerging in China in the early 1990s, Falun Gong is viewed by its supporters as a folk movement promoting the benefits of good health and moral cultivation. To the Chinese establishment, however, it is a dissident religious cult threatening political orthodoxy and national stability. The author, a Chinese national once involved in implementing Chinese cultural policies, examines the evolving relationship between Falun Gong and Chinese authorities in a revealing case study of the powerful public discourse between a pervasive political ideology and an alternative agenda in contention for cultural dominance. Posited as a cure for culturally bound illness with widespread symptoms, the Falun Gong movement's efficacy among the marginalized relies on its articulation of a struggle against government sanctioned exploitation in favor of idealistic moral aspirations. In countering such a position, the Chinese government alleges that the religious movement is based in superstition and pseudoscience. Aided by her insider perspective, the author deftly employs Western rhetorical methodology in a compelling critique of an Eastern rhetorical occurrence, highlighting how authority confronts challenge in postsocialist China.
