1934 — Detroit's Schoolboy Rowe won his 16th consecutive game with a 4-2 triumph over the Washington ... in the eighth to take an 11-10 lead. 2011 — The New York Yankees became the first ...

A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future. "A masterpiece."—Steven D. Levitt, coauthor of Freakonomics "Bursting with insights."—The New York Times Book Review

As the United Nations Decade on Biodiversity 2011–2020 comes to a close and countries prepare to adopt a post-2020 global biodiversity framework, this edition of The State of the World's Forests (SOFO) examines the contributions of forests, and of the people who use and manage them, to the conservation and sustainable use of biodiversity. Forests cover just over 30 percent of the global land area, yet they provide habitat for the vast majority of the terrestrial plant and animal species known to science. Unfortunately, forests and the biodiversity they contain continue to be under threat from actions to convert the land to agriculture or unsustainable levels of exploitation, much of it illegal. The State of the World's Forests 2020 assesses progress to date in meeting global targets and goals related to forest biodiversity and examines the effectiveness of policies, actions and approaches, in terms of both conservation and sustainable development outcomes. A series of case studies provide examples of innovative practices that combine conservation and sustainable use of forest biodiversity to create balanced solutions for both people and the planet.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

For the criminal justice system to work, adequate resources must be available for police, prosecutors and public defense. This timely, incisive and important book by Professor Norman Lefstein looks carefully at one leg of the justice system's "three-legged stool"public defenseand the chronic overload of cases faced by public defenders and other lawyers who represent the indigent. Fortunately, the publication does far more than bemoan the current lack of adequate funding, staffing and other difficulties faced by public defense systems in the U.S. and offers concrete suggestions for dealing with these serious issues.

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

For its final battleship design Italy ignored all treaty restrictions on tonnage, and produced one of Europe's largest and most powerful capital ships, comparable with Germany's Bismarck class, similarly built in defiance of international agreements. The three ships of the Littorio class were typical of Italian design, being fast and elegant, but also boasting a revolutionary protective scheme – which was tested to the limits, as all three were to be heavily damaged in the hard-fought naval war in the Mediterranean; Roma had the unfortunate distinction of being the first capital ship sunk by guided missile. These important ships have never been covered in depth in English-language publications, but the need is now satisfied in this comprehensive and convincing study by two of Italy's leading naval historians. The book combines a detailed analysis of the design with an operational history, evaluating how the ships stood up to combat. It is illustrated with an amazing collection of photographs, many fine-line plans, and coloured artwork of camouflage schemes, adding up to as complete a monograph on a single class ever published. Among warship enthusiasts battleships enjoy a unique status. As the great success of Seaforth's recent book on French battleships proves, that interest transcends national boundaries, and this superbly executed study is certain to become another classic in the field.

You think you know Hollywood Hulk Hogan™? Brother, you don't know squat about me. Yeah, I'm the towering red-and-yellow warrior who revolutionized the wrestling business, the larger-than-life superhero who transformed an entire country into a horde of Hukamaniacs. I'm the guy who spit blood and breathed fire to help create an empire called World Wrestling Entertainment™. But it wasn't always like that. Once I was a fat kid named Terry Bollea watching legends like Dusty Rhodes and Superstar Billy Graham, never dreaming I'd be a professional wrestler myself one day. Run with me on the streets of Tampa, where a bass guitar became my salvation. Fight alongside me in the wrestling arenas of Japan, where opponents try to bite your fingers off to make a name for themselves. Slide into the ring with me against 700-pound Andre the Giant, who only became my best friend after he found out he couldn't beat me down. Then cruise L.A. with me and Sylvester Stallone on the heels of Rocky III. Learn why Minnesota Governor Jesse Ventura hates my guts. Go head-to-head with Dennis Rodman in a hard-liquor drinking contest, and share a dressing room with Liberace. Find out what makes me cry like a baby, what makes my blood boil, what I think of Jesus Christ, and what scares the living hell out of me. Then tell me you know the man called Hollywood Hulk Hogan. Join the Babe Ruth of wrestling on a gritty, no-holds-barred odyssey from his start in the barbaric wrestling arenas of the seventies through the heartbreak of potentially career-ending surgery to the achievement of his greatest triumph yet. Along the way, lock up with the likes of Cyndi Lauper, Andy Kaufman, Dolly Parton, Mr. T, Ted Turner, George Foreman, Jay Leno, Undertaker, Triple H, The Rock...and of course, Vince McMahon, head of World Wrestling Entertainment™. They're all in here, waiting to show you what they've got. Hollywood Hulk Hogan™. It's the real deal, brother.
