DO NO HARM - DO KNOW HARM FULL-SIZE FORMAT - "biggest edition available anywhere": giant 8.5" x 11" size means large, clear print and pictures. Created and trusted by U.S. forces to educate Combat Medic Specialists and save lives from traumatic injury under the most adverse emergency conditions. "Batteries last hours, books last decades. Get the print edition!" Current edition - complete & unabridged: MOS 68W - STP 8-68W13-SM-TG (Health Care Specialists Skill Levels 1, 2, and 3). The Combat Medic is one of the U.S. Army's most enduring and treasured figures, responsible for saving countless thousands of lives in action across the globe. This giant medical reference book - over 500, 8.5" x 11" pages - covers everything the aspiring Combat Medic Specialist (MOS 68W), conscientious soldier, or other interested party needs to know about saving lives on the battlefield or in any other emergency, conflict, or humanitarian situation. Not only that, it is also a training guide that will show you how to rapidly educate others to become competent field medics. This is no mere first aid guide or first-responder course. It is a large, comprehensive, no-nonsense manual that will enable you to preserve life and ease discomfort when there is no-one else on whom to call. Written by the most demanding of experts, with the benefit of decades of hard-won experience in war-zones around the world, this book is an investment in your future, and the future of those around you. Search for 'CARLILE MILITARY LIBRARY' to find more TOP-FLIGHT, SQUARED-AWAY publications for your professional bookshelf! Published in the U.S.A. by CARLILE MEDIA. Information purposes only.

The Combat Medic of today is the most technically advanced ever produced by the United States Army. Such an advanced technician requires an advanced teaching and learning system. 68W Advanced Field Craft is the first textbook designed to prepare the Combat Medic for today's challenges in the field. The ability to save lives in war, conflicts, and humanitarian inventions requires a specific skill set. Today's Combat Medic must be an expert in emergency medical care, force health protection, limited primary care, evacuation, and warrior skills. 68W Advanced Field Craft combines complete medical content with dynamic features to support instructors and to prepare Combat Medics for their missions.*

The ability to save lives in war, conflicts, and humanitarian interventions requires sophisticated skills above and beyond first aid. Today's Combat Medic must be an expert in emergency care, force health protection, limited primary care, and warrior skills. The Combat Medic Field Reference provides easy access to essential information on triage, treatment, and US Army procedures. This handy pocket-sized reference features waterproof pages for making temporary or permanent notes.

Because medical personnel will not always be readily available, nonmedical Soldiers must rely on themselves and other Soldiers' skills and knowledge of first aid methods to render aid until medical assistance arrives. First aid is given until medical care provided by medically trained personnel such as a combat medic or other health care provider arrives.The individual being provided first aid (by self-aid, buddy aid, or combat lifesaver) is considered a casualty. Once medically trained personnel (combat medic, paramedic, or other health care provider) initiates care, the casualty is then considered to be a patient.Training Circular 4-02.1 provides first aid procedures for nonmedical personnel in environments from home station to combat situations. This publication is meant to be used by trainers and individuals being trained based on common first aid tasks. Tasks are found in the Soldier's Manual of Common Tasks, Warrior Skills Level 1, and appropriate modified tasks from the Soldier's Manual and Trainer's Guide, Military Occupational Specialty (MOS) 68W. These tasks are meant to reinforce and maintain proficiency in correct procedures for giving first aid throughout a Soldier's time in Service.Training Circular 4-02.1 is designed to facilitate training and first aid competencies by bridging first aid training across the spectrum of assignments from training to permanent duty station and deployment. Tactical combat casualty care (TC3) is introduced in TC 4-02.1 with first aid tasks and procedures associated with combat situations. Individual and multiple first aid tasks in combination with collective tasks, may be integrated into various training scenarios.

Training Circular (TC) 3-21.76 uses joint terms where applicable. Selected joint and Army terms and definitions appear in both the glossary and the text. Terms for which TC 3-21.76 is the proponent publication (the authority) are italicized in the text and are marked with an asterisk (*) in the glossary. Terms and definitions for which TC 3-21.76 is the proponent publication are boldfaced in the text. For other definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition. The principal audience for TC 3-21.76 are U.S. Army Rangers and combat arms units. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will also use this publication.

The Special Operations Forces Medical Handbook is a comprehensive reference designed for combat and special forces medics in the field, it is also a must-have reference for any military or emergency response medical personnel, particularly in hostile environments. Developed as a primary medical information resource and field guide for the Special Operations Command (SOCOM). As a grid-down medical reference for the doomsday prepper it can't be beaten. Defines the standard of health care delivery under adverse and general field conditions. Organized according to symptoms, organ systems, specialty areas, operational environments and procedures. Emphasizes acute care in all its forms (including gynecology, general medicine, dentistry, poisonings, infestations, parasitic infections, acute infections, hyper- and hypothermia, high altitude, aerospace, dive medicine, and sanitation.). DO NO HARM, DO KNOW HARM The following medical texts should be in the prps of every serious off-grid survivor: Ranger Medic Handbook Special Operations Medical Handbook STP 31-18D34-SM-TG A MOS 18D Special Forces Medical Sergeant PART A: Skill Levels 3 and 4 STP 31-18D34-SM-TG B MOS 18D Special Forces Medical Sergeant PART B: Skill Levels 3 and 4

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

Since ocular infections are one of the most frequent occurrences in ophthalmology, the treatment for these infections must be fast, precise and effective. In order to address this goal, it is important to identify and characterize the culprit microorganisms involved in the pathogenesis of ocular infections. Clinical diagnosis of ocular infections can be confirmed by several techniques based on microbiological test of ocular samples. Some of these techniques include classic microbiological testing in which it is necessary to isolate microorganisms to characterize them by biochemical analysis which require significant resources and timing.
