This book is open access under a CC BY NC ND 4.0 license. This open access book discusses how Norwegian shipping companies played a crucial role in global shipping markets in the 20th century, at times transporting more than ten per cent of world seaborne trade. Chapters explore how Norway managed to remain competitive, despite being a high labour-cost country in an industry with global competition. Among the features that are emphasised are market developments, business strategies and political decisions The Norwegian experience was shaped by the main breaking points in 20th century world history, such as the two world wars, and by long-term trends, such as globalization and liberalization. The shipping companies introduced technological and organizational innovations to build or maintain a competitive advantage in a rapidly changing world. The growing importance of offshore petroleum exploration in the North Sea from the 1970s was both a threat and an opportunity to the shipping companies. By adapting both business strategies and the political regime to the new circumstances, the Norwegian shipping sector managed to maintain a leading position internationally.

Individual studies of the world's major airports review their histories, dimensions, scopes of operation, and positions on international air routes and discuss their official policies regarding pollution, terrorism, and energy conservation

#1 NEW YORK TIMES BESTSELLER An explosive exposé that lays out the story behind the Steele Dossier, including Russia's decades-in-the-making political game to upend American democracy and the Trump administration's ties to Moscow. "Harding...presents a powerful case for Russian interference, and Trump campaign collusion, by collecting years of reporting on Trump's connections to Russia and putting it all together in a coherent narrative." --The Nation December 2016. Luke Harding, the Guardian reporter and former Moscow bureau chief, quietly meets former MI6 officer Christopher Steele in a London pub to discuss President-elect Donald Trump's Russia connections. A month later, Steele's now-famous dossier sparks what may be the biggest scandal of the modern era. The names of the Americans involved are well-known--Paul Manafort, Michael Flynn, Jared Kushner, George Papadopoulos, Carter Page--but here Harding also shines a light on powerful Russian figures like Aras Agalarov, Natalia Veselnitskaya, and Sergey Kislyak, whose motivations and instructions may have been coming from the highest echelons of the Kremlin. Drawing on new material and his expert understanding of Moscow and its players, Harding takes the reader through every bizarre and disquieting detail of the "Trump-Russia" story--an event so huge it involves international espionage, off-shore banks, sketchy real estate deals, the Miss Universe pageant, mobsters, money laundering, poisoned dissidents, computer hacking, and the most shocking election in American history.

The peer reviewed papers in this new volume of the European Academy of Land Use and Development (EALD) inform about investigations on the common subject «land management» – due to the interdisciplinary nature of the EALD from very different views. The spectrum of contributions covers regulations, governance and the implementation of land management as well as the assessment of relevant data supporting these tasks. Various approaches, methods, systems and understanding of the government 's role in the different countries of Europe are highlighted. Committed to sustainability, the articles give evidence that Europe provides an experimental field for land management issues, and they enable to increase knowledge of new practices, to verify them and to learn from each other.

COVID-19 has reshaped how social, economic, and political power is created and exerted through technology.Through international case studies, this book analyses how technologies of monitoring infections, information, and behaviour have been applied and justified during the emergency, what their side-effects have been, and what kinds of resistance they have met.

"Huntley: A Mason Family Country House" by Tony P. Wrenn. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten - or yet undiscovered gems - of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

An eloquent portrayal of the UK's primary hub of air travel, Kevan James delves into the story of Heathrow Airport and reveals the truth and the legends behind it. Seen not only from the eyes of the author himself, and including his own use of Heathrow, the book also details the lives of some of those who work there. This is an intriguing look at the London air transport hub.
