provided, which enable the reader to understand design aspects better and to enable students to comprehend basic principles; and summaries at the end of each chapter that help students recapitulate all the concepts learnt.

This well-received and widely adopted text, now in its Second Edition, continues to provide an in-depth analysis of the fundamental principles of Transducers and Instrumentation in a highly accessible style. Professor D.V.S. Murty, who has pioneered the cause of development of Instrumentation Engineering in various engineering institutes and universities across the country, compresses his long and rich experience into this volume. He gives a masterly analysis of the principles and characteristics of transducers, common types of industrial sensors and transducers. Besides, he provides a detailed discussion on such topics as signal processing, data display, transmission and telemetry systems, all the while focusing on the latest developments. The text is profusely illustrated with examples and clear-cut diagrams that enhance its value. **NEW TO THIS EDITION :** To meet the latest syllabi requirements of various universities, three new chapters have been added: **CHAPTER 12: Developments in Sensor Technology** **CHAPTER 13: Sophistication in Instrumentation** **CHAPTER 14: Process Control Instrumentation** Primarily intended as a text for the students pursuing Instrumentation and Control Engineering, this book would also be extremely useful to professional engineers and those working in R&D organisations.

Suitable for an introductory course or a second course in Instrumentation, this book includes: software-controlled measurements; time interval measurement when the two events occur arbitrarily, and to indicate the order of occurrence, and a practical set up for the time interval measurement; multi-phase sequence indicator; decibel meter; and more.

The Indo-Pacific is amongst the most important strategic areas in the world today. The four vibrant, committed democracies spanning the Indo-Pacific—India, USA, Japan and Australia have joined hands in a Track II dialogue to discuss their common security interests, including management of the China challenge, in what has come to be known as the Quad. In 2013, The Heritage Foundation, Vivekananda International Foundation (VIF), The Tokyo Foundation and the Australian Strategic Policy Institute (ASPI) came together in Canberra, Australia to reinvigorate efforts for the Quadrilateral Strategic Dialogue. In an effort to expand the dialogue to other democracies with a strategic stake, scholars from the Philippines and Indonesia were also included. The day-and-a-half Quad Plus Dialogue revolved around several papers prepared by select participants, discussants assigned to critique the papers, and roundtable discussion. The papers, as revised, follow in this volume. The plan of the partner organisations is to continue the dialogue indefinitely on an annual basis and rotate the plus role among other democratic stakeholders in the region. This thought-provoking book, with contributions by well-known analysts and experts from the Quad Plus countries, provides insights into the challenges being faced in the Indo-Pacific and the extent of engagement amongst the democracies of the area in meeting them.
