This essential publication focuses on what the CMA needs to know about intravenous infusion therapy. Infusion or IV therapy has long been part of the acute care of patients. However, more patients are receiving IV therapy at home, in emergency centers, at infusion centers, and in dialysis clinics. Thus, CMAs often need to understand IV therapy to lay out the equipment, to monitor the patient, to assess the infusion site, to discontinue the infusion, and perhaps even to insert the IV. The purpose of this book is to help you understand the theory of IV therapy. With patient safety in mind, risks, complications, and adverse reactions are discussed in Intravenous Infusion Therapy for Medical Assistants. Giving the correct medication is crucial to the CMA, so intravenous infusion preparations are compared and contrasted. Sidebars of Medical Assisting Alerts and Tips are distributed throughout the text to highlight key safety concerns and professional issues. Each chapter concludes with Review Questions and Activities to ensure that learning objectives have been met.

In today’s dynamic health care environment, medical assistants are playing an increasingly important role. DELMAR’S CLINICAL MEDICAL ASSISTING, Fifth Edition, helps you gain the knowledge and skills needed to succeed in this rewarding, rapidly growing field. Known for its thorough coverage, extensive technical detail, and accurate, up-to-date content, this proven book covers clinical tasks such as taking patients’ medical histories, recording vital signs, explaining procedures, and assisting care providers during exams, as well as administrative duties including managing patient information, electronic medical records (EMR), insurance documentation, billing, and bookkeeping. In addition, chapter material and learning objectives are clearly mapped to ABHES, CAAHEP, and MAERB competencies to help you hone practical, real-world skills and prepare for certification. The guide also supports effective learning with a variety of online resources to help you make the most of your study time, including interactive quizzes for self-assessment and the popular Critical Thinking Challenge application. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This Workbook is part of a dynamic learning system that helps reinforce the essential competencies needed to become a successful, multiskilled medical assistant. It will challenge you to apply the chapter information from Delmar’s Clinical Medical Assisting, Third Edition, while employing critical thinking skills. Delmar is a part of Cengage Learning.

Specifically designed to apply concepts and develop critical thinking, this workbook will help strengthen your knowledge and skills as you prepare to enter the medical assisting profession. Competency assessment checklists for each procedure track all of the administrative, clinical, and general competencies designated by ABHES and CAAHEP.

The competency manual provides step-by-step procedure checklists to practice competencies required for an entry-level medical assistant. The manual also includes assessment information required to complete the competencies, as well as any necessary forms.

The study guide is designed to help students retain key chapter content and apply critical thinking skills. Expanded activities include new critical thinking exercises, web activities, and hands-on applications. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
