Focused Review - Study Only What You Need to Know The Crash Course is based on an in-depth analysis of the new AP® Physics 1 course description outline and actual AP® test questions. It covers only the information tested on the exam, so you can make the most of your valuable study time. Written by an AP® Physics teacher, the targeted review prepares students for the new test by focusing on the new framework concepts and learning objectives tested on the redesigned AP® Physics 1 exam. Easy-to-read review chapters in outline format cover all the topics tested on the new exam: kinematics; dynamics; Newton's laws; circular motion and universal law of gravitation; work, energy, and conservation of energy; rotational motion; DC circuits; mechanical waves and sound; and more. The book also features must-know terms all AP® Physics students should know before test day. Expert Test-taking Strategies With our Crash Course, you can study the subject faster, learn the crucial material, and boost your AP® score all in less time. Our author shares detailed question-level strategies and explains the best way to answer the multiple-choice and free-response questions you'll encounter on test day. By following our expert tips and advice, you can boost your overall point score!
