This sequel to The Stars Are Ours! was first published in 1957 by the World Publishing Company. It continues the tale of the humans who escaped an anti-intellectual Earth and founded a colony on Astra, a planet across the galaxy. Astra has a vibrant, intelligent species, as well as the ruins of a much older civilization. Norton weaves two stories together by alternating points of view with each chapter. We follow a 4th generation colonist, as well as a mechanic-pilot newly arrived on Astra as a member of a research mission from a recently revived Earth. Each is on a journey of discovery, and they find themselves allied with opposing sides of an ongoing war between two intelligent, indigenous species. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Jenna Starborn was created out of frozen embryonic tissue, a child unloved and unwanted. Yet she has grown up with a singularly sharp mind—and a heart that warms to those she sees as less fortunate than herself. This novel takes us into Jenna Starborn's life, to a planet called Fieldstar, and to a property called Thorrastone—whose enigmatic lord will test the strength of that tender and compassionate heart.

Many live their entire existence without encountering a character-defining moment, that point when one must make a life-altering decision and live with the consequences. This isnt the case for Jake Williams, a retired astronaut on a camping trip in the Colorado Rockies southwest of Denver. His defining moment involves a life-and-death struggle to save an injured alien whose dark purpose changes Jakes life. As Jake attempts to save the alien, an unexplainable bond develops. The alien forsakes his people and transfers not only telepathic control of his ship to Jake, but also his vast knowledge of the universe and a critical part of his DNA. From that moment, Jake becomes responsible for the lives of everything on the planet. Hes asked to sacrifice all he holds dear and is tested to the limits of human endurance. During this chaos and overwhelming hopelessness, family, friends, and government leaders rally to help him save humanity by fleeing the coming destruction. As Jake reaches his limits, a young woman crosses his path, a beautiful Spanish girl half his age. Gena serves as the personal secretary of the first female president of the United States, and shes unwillingly pulled into the circle surrounding Jake and his ship. For a long time, they both resist the feelings growing between them. But Genas wild passion and Jakes raging desire ignites a powerful love binding them across the vast distances of space and is the driving force that saves mankind.

Shortlisted for the 2016 David Gemmell Morningstar Award for Best Debut Death and destruction will bar her way. . . Kyndra's fate holds betrayal and salvation, but the journey starts in her small village. On the day she comes of age, she accidentally disrupts an ancient ceremony, ending centuries of tradition. So when an unnatural storm targets her superstitious community, Kyndra is blamed. She fears for her life until two strangers save her, by wielding powers not seen for an age - powers fuelled by the sun and the moon. Together, they flee to the hidden citadel of Naris. And here, Kyndra experiences disturbing visions of the past, showing war and one man's terrifying response. She'll learn more in the city's subterranean chambers, amongst fanatics and rebels. But first Kyndra will be brutally tested in a bid to unlock her own magic. If she survives the ordeal, she'll discover a force greater than she could ever have imagined. But could it create as well as destroy? And can she control it, to right an ancient wrong? With George R. R. Martin's Game of Thrones now a huge TV success, fantasy fiction has never been more popular. And these books are traditional fantasy at its very best.

Born to a star, Wiali faced fifteen hundred years of stasis followed by ten years of work in the Citadel. While frozen, the entire Archive of the Alliance ran through her mind, her education was controlled by her whims. When her father went nova, she was finally and definitely alone until the moment Suekés last Avatar came to tell her she was transferred from Citadel Aria to Citadel Lowel, the adjunct to Sector Guard Base Udell. Braenar knew that Suek had chosen him for Wiali, but the mechanism by which they would meet again was a mystery until she walked into his life with a group of students trailing behind her. From that moment on, he kept tabs on her until the day he could tell her that she was stuck working with him in deadly and dangerous situations. Planets, power and infinite peril!What girl doesn't want that sort of thing in her life?
