Fashion with Function Step into the fascinating world of watches. From the early "trench watches" of World War I to some of today's elegant diamond-studded cocktail watches, Vintage Wristwatches will entertain and educate you about these small works of art that have stood the test of time. Whether novice or seasoned collector, you'll enjoy the rich histories of American and European manufacturers past and present. Original newspaper and magazine advertisements complement more than 1,200 photographs of collectible wristwatches, while brief descriptions include values recently commanded at auction. In addition, you'll find: □ A glossary of watch terminology commonly used among collectors □ Tutorials for identifying wristwatches □ Factors to consider when determining a wristwatch's value

The Death Star is a spherical space station, the size of a small moon, highly armoured and armed to destroy anything from enemy spaceships to whole planets. Using cutaway drawings, exploded diagrams and photographs, backed by detailed technical specifications and descriptions of the onboard systems, this owner's manual reveals the technology contained within and lays bare the awesome power (and weaknesses) of the Empire's ultimate weapon.

The early 2000s were an important period, spanning a time when mechanical watches had quite rightly retaken their place in the world market. We all may have a digital device in our pocket that is more accurate than a mechanical watch, but a timepiece has soul, personality, and history. The collection in this book is a step into the world of vintage watch collecting, with a range of photographs, intricate research, and accessible reference material that will intrigue both the casual and avid enthusiast. The collection showcases some of the most interesting, luxurious, and functional 20th-century (1930-1980) mechanical timepieces ever to be

produced, including Heuer's Autavia, Rolex's Submariner, Gallet's MultiChron, Zenith's De Luca, and the Universal Space Compax.

Comprehensive. Detailed. Practical. Set Lighting Technician's Handbook, Fourth Edition, is a friendly, hands-on manual covering the day-to-day practices, equipment, and tricks of the trade essential to anyone doing motion picture lighting, including the lamp operator, rigging crew, gaffer, best boy, or director of photography. This handbook offers a wealth of practical technical information, useful techniques, as well as aesthetic discussions. The Set Lighting Technician's Handbook focuses on what is important when working on-set: trouble-shooting, teamwork, set protocol, and safety. It describes tricks and techniques for operating a vast array of lighting equipment including LEDs, xenons, camera synchronous strobes, black lights, underwater units, lighting effects units, and many others. Since its first edition, this handy on-set reference continues to be widely adopted as a training and reference manual by union training programs as well as top university film production programs. New to the fourth edition: * Detailed information on LED technology and gear * Harmonized with union safety and training procedures * All the latest and greatest DMX gadgets, including remote control systems * Many new and useful lights and how to use them and troubleshoot them. * New additions to the arsenal of electrical distribution equipment that make our sets safer and easier to power. * More rigging tricks and techniques. * the same friendly, easy to read style that has made this book so popular.
