Based on breakthrough new science in the field of hydration, Quench debunks many popular myths about "getting enough water" and offers a revolutionary five-day jump start plan that shows how better hydration can reduce or eliminate ailments like chronic headaches, weight gain, gut pain, and even autoimmune conditions. Chronic headaches, brain fog, fatigue, weight gain, insomnia, gut pain, autoimmune conditions. We may think these and other all-too-common modern maladies are due to gluten intake or too much sugar or too little exercise. But there is another missing piece to the health puzzle: Proper hydration. Yes, even in this era of Poland Spring many of us are dehydrated due to moisture-lacking diets, artificial environments, medications, and over-dependence on water as our only source of hydration. For this reason, that new diet or exercise plan may fail because our body doesn't have enough moisture to support it. Quench presents a wellness routine that can reverse all of that, based on breakthrough new science in the field of hydration. Readers will be surprised to learn that drinking too much water can flush out vital nutrients and electrolytes. Here is where "gel water" comes in: the water from plants (like cucumber, berries, aloe), which our bodies are designed to truly absorb right down to the cellular level. In fact, Ms. Bria's work as an anthropologist led her to the realization that desert people stay hydrated almost exclusively from what they eat, including gel plants like cactus. Based on groundbreaking science from the University of Washington's Pollack Water Lab and other research, Quench offers a five-day jump start plan: hydrating meal plans and the heart of the program, smoothies and elixirs using the most hydrating and nutrient-packed plants. Another unique feature of their approach is micro-movements -- small, simple movements you can make a few times a day that will move water through your fascia, the connective tissue responsible for hydrating our bodies. You will experience more energy, focus, and better digestion within five days . . . then move onto the lifetime plan for continued improvements, even elimination of symptoms.

We are at a unique time in American history and our personal history when we need real help, real hope, and real answers for the day to day realities we’re facing. We live in a financial and work world that is experiencing rapid and unprecedented changes. It is as if Americans have spent years building their financial houses that were like sand castles on the beach. For a long time many of our sand castles looked beautiful and kept getting bigger in the sunshine of the day. But now strong ocean tides and ground-shaking tremors beyond our personal control are beginning to move in and our sand castles are beginning to crack and their very existence is being threatened. This book was written to help you “consider your ways” and to consider God’s Word. Explore the idea of experiencing God as your provider, begin to build your finances and life on the solid Rock of God’s Word, and learn to become a generous person. This book is filled with Scriptures that will instruct and true stories that will inspire. This is not a money management book, but rather it is a book that will help you manage your life under leadership of Christ.

It provides an integrated model of public knowledge production and engagement with science. As a growing worldwide phenomenon, it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community. Catalysed by citizens' wishes to be actively involved in scientific processes, as a result of recent societal trends, it also offers contributions to the rise in tertiary education. The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation, and discuss progress towards responsible research and innovation, two of the most critical aspects of science today.

As women, we learn from an early age that our moods are a problem. To succeed in life, we are told, we must have it all under control: we have to tamp down our inherent shifts in favor of a more static way of being. But our bodies are wiser than we imagine. Moods are not an annoyance to be stuffed away, they are a finely-tuned feedback system that can tell us how best to manage our lives. Our changing moods let us know when our bodies are primed to tackle different challenges and when we should be alert to developing problems. They help us select the right tool for each of our many jobs. If we deny our emotionality, we deny the breadth of our talents. With the right care of our inherently dynamic bodies, we can master our moods to avail ourselves of this great natural strength. Yet millions of American women are medicating away their emotions because our culture says that moodiness is a problem to be fixed. Over-prescribed medications can have devastating consequences for women in many areas of our lives--and even if we don't pop a pill, women everywhere are numbing their emotions with food, alcohol, and a host of addictive behaviors that deny the wisdom of our bodies and keep us from addressing the real issues that we face. Here, Dr. Julie Holland shares a better way.--From publisher description.
