This book provides a review of the theoretical, empirical, and instructional issues in the field of college reading and study strategies through a careful and systematic examination of the relevant literature. The articles and their authors are, as follows:
(1) "Vocabulary Acquisition and the College Student" (Michele L. Simpson and Edward J. Dwyer); (2) "Teacher-Directed Comprehension Strategies" (Sherrie L. Nist and Donna L. Mealey); (3) "Textbook Study Strategies" (David C. Caverly and Vincent P. Orlando); (4) "The Value of Taking Notes During Lectures" (Thomas H. Anderson and Bonnie B. Armbruster); (5) "External Factors That Influence Study" (Victoria J. Risko and others); (6) "Internal Factors That Influence Study" (Victoria J. Risko and others); and (7) "Preparing for and Taking Tests" (David M. Wark and Rona F. Flippo). (KEH)

Summary Generative Art presents both the technique and the beauty of algorithmic art. The book includes high-quality examples of generative art, along with the specific programmatic steps author and artist Matt Pearson followed to create each unique piece using the Processing programming language. About the Technology Artists have always explored new media, and computer-based artists are no exception. Generative art, a technique where the artist creates print or onscreen images by using computer algorithms, finds the artistic intersection of programming, computer graphics, and individual expression. The book includes a tutorial on Processing, an open source programming language and environment for people who want to create images, animations, and interactions. About the Book Generative Art presents both the techniques and the beauty of algorithmic art. In it, you'll find dozens of high-quality examples of generative art, along with the specific steps the author followed to create each unique piece using the Processing programming language. The book includes concise tutorials for each of the technical components required to create the book's images, and it offers countless suggestions for how you can

combine and reuse the various techniques to create your own works. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book. What's Inside The principles of algorithmic art A Processing language tutorial Using organic, pseudo-random, emergent, and fractal processes ===== Table of Contents Part 1 Creative Coding Generative Art: In Theory and Practice Processing: A Programming Language for Artists Part 2 Randomness and Noise The Wrong Way to Draw A Line The Wrong Way to Draw a Circle Adding Dimensions Part 3 Complexity Emergence Autonomy Fractals

This book is a mini tutorial with plenty of code examples and strategies to give you many options when building your own applications. This book is meant for readers who are familiar with C/C++ programming and want to write simple programs with Kinect. The standard template library can also be used as it is simple enough to understand.

"Read this book to learn how to create a company as powerful as Apple."—Guy Kawasaki, former chief evangelist of Apple In *Escape Velocity* Geoffrey A. Moore, author of the marketing masterwork *Crossing the Chasm*, teaches twenty-first century enterprises how to overcome the pull of the past and reorient their organizations to meet a new era of competition. The world's leading high-tech business strategist, Moore connects the dots between bold strategies and effective execution, with an action plan that elucidates the link between senior executives and every other branch of a company. For readers of Larry Bossidy's *Execution*, Clay Christensen's *Innovator's Solution*, and Gary Vaynerchuck's *Crush It!*, and for anyone aiming for the pinnacle of business success, *Escape Velocity* is an irreplaceable roadmap to the top.

Kristie Barnett reveals the secrets of her proven method of Psychological Staging to quickly sell residential real estate for top dollar. This method has earned her both local and national awards for home staging, and has made *The Decorologist* the go-to authority in the field of real estate staging.

"To understand the hearts and minds of those who have yet to commit themselves to the gospel, Frank G. Honeycutt assembled two extraordinary groups of people. The first was comprised of skeptics, folks who rarely, if ever, darkened a church door. Though they were not hostile to Christian faith, they had little sense that it could be personally meaningful for them. The second group was made up of seekers, those who were just beginning to explore the gospel and the claims it might have on their lives. Both groups covenanted to attend

worship at Honeycutt's church, and then meet with him afterward to share their perceptions of his sermons. The results provide insights that preachers rarely have the opportunity to gain into the questions and struggles of skeptics and seekers. In sometimes startling ways the author reveals how some aspects of the gospel message appeal easily and directly to skeptics and seekers, while others can often be a stumbling block. Offering the reader helpful guidance in how to craft a sermon so that seekers might best grasp its message, he also reminds them that the work of transforming human hearts is finally God's business, and that when God's word is spread abroad it will not return empty."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Bram Stoker kept secret a tale even more terrifying than Dracula. It begins among the Carpathian peaks, when an intrepid explorer discovers a mysterious golden box. She brings it back with her to the foggy streets of Victorian London, unaware of its dangerous power...or that an evil beyond imagining has already taken root in the city. Stoker, a successful theater manager but frustrated writer, is drawn into a deadly web spun by the wealthy founders of a mission house for the poor. Far from a safe haven, the mission harbors a dark and terrifying secret. To save the souls of thousands, Stoker--aided by the explorer and a match girl grieving the loss of her child--must pursue an enemy as ancient as the Saharan sands where it originated. Their journey will take them through the city's overgrown graveyards and rat-infested tunnels and even onto the maiden voyage of the world's first "unsinkable" ship...
