Do your sentences sag? Could your paragraphs use a pick-me-up? If so, The Writer's Diet is for you! It's a short, sharp introduction to great writing that will help you energize your prose and boost your verbal fitness. Helen Sword dispenses with excessive explanations and overwrought analysis. Instead, she offers an easy-to-follow set of writing principles: use active verbs whenever

possible; favor concrete language over vague abstractions; avoid long strings of prepositional phrases; employ adjectives and adverbs only when they contribute something new to the meaning of a sentence; and reduce your dependence on four pernicious "waste words": it, this, that, and there. Sword then shows the rules in action through examples from William Shakespeare, Emily Dickinson, Martin Luther King Jr., John McPhee, A. S. Byatt, Richard Dawkins, Alison Gopnik, and many more. A writing fitness test encourages you to assess your own writing and get immediate advice on addressing problem areas. While The Writer's Diet is as sleek and concise as the writing ideals contained within, this slim volume packs a powerful punch. With Sword's coaching writers of all levels can strengthen and tone their sentences with the stroke of a pen or the click of a mouse. As with any fitness routine, adhering to

the rules requires energy and vigilance. The results, however, will speak for themselves.

You must write an application essay. This essay might accompany an application to college, graduate school, or professional school. Or it might be part of a job application or a request for a scholarship or other funding. Regardless of the nature of the application, all of these essays are united by a common purpose: you want something, and this essay is part of the formal request made to the person or organization with the power to give it to you. Even though you might have seen other application essays, you still might not know how to compose yours. Maybe you have never written an

essay like this before, so you are unsure about how it differs from other kinds of essays. Maybe you have written an essay like this in the past, but you were unhappy with the product or the result and you want to improve your chances this time. Maybe, no matter your skills and experiences, you are just looking for extra help so that this kind of essay will be easier to complete. Few of us have been taught how to write this type of essay. Is it casual or academic? Is it supported with research? How much should you reveal about yourself? These and many more questions can make it tricky to even know where to begin. And it is very likely that you might not have anyone to help you with this. Because application essays are extra-curricular, even if you are a current student with access to writing instructors, your application essay will not be part of that syllabus. The writing expert teaching your class might not be available to

instruct you in this type of writing in their time off. This booklet can help you by showing you the complete process of writing an application essay for a scholarship, academic program, or employment opportunity. This practical, systematic method will start with a basic discussion of the purpose of application essays and end with a final proofreading. In between that first and last step, you will learn how to write each section of an application essay, piece by piece. These sectional breakdowns show you exactly what to include in different places within the essay. You will no longer need to guess what to write and where to write it. By using the breakdown, the various pieces of the document will work together to create a coherent and complete whole. Working the sections carefully will teach you the writing method for this type of essay. Then, when you must write another application essay, use this

booklet as a reference to help you remember what each section can include. The more you use the method, the easier it will be.

Students of all levels need to know how to write a well-reasoned, coherent research paper—and for decades Kate L. Turabian's Student's Guide to Writing College Papers has helped them to develop this critical skill. For its fifth edition, Chicago has reconceived and renewed this classic work for today's generation. Addressing the same range of topics as Turabian's A Manual for Writers of Research Papers, Theses, and Dissertations but for beginning writers and researchers, this guide introduces students to the art of formulating an effective argument, conducting high-quality research with limited resources, and writing an engaging class paper. This new edition includes fresh examples of research

topics, clarified terminology, more illustrations, and new information about using online sources and citation software. It features updated citation guidelines for Chicago, MLA, and APA styles, aligning with the latest editions of these popular style manuals. It emphasizes argument, research, and writing as extensions of activities that students already do in their everyday lives. It also includes a more expansive view of what the end product of research might be, showing that knowledge can be presented in more ways than on a printed page. Friendly and authoritative, the fifth edition of Student's Guide to Writing College Papers combines decades of expert advice with new revisions based on feedback from students and teachers. Time-tested and teacher-approved, this book will prepare students to be better critical thinkers and help them develop a sense of inquiry that will serve

them well beyond the classroom.

like bragging? and How do I make my essay, like, deep? Packed
with tips, tricks, exercises, and sample essays from real students who
got into their dream schools, College Essay Essentials is the only
college essay guide to make this complicated process logical, simple,
