Leadership (at least in some areas), human capital capabilities, manufacturing, and the industrial base. And these are not the only components. National security goes to the very core of

how we define who we are as a people and a free society. It concerns how we view our world responsibilities. Economic security is a major element of national security, even as borders are less important

the Japanese and German economies that led those nations into

World War II.

Poverty around the world is a global systemic issue that frequently can and does lead to political instability. But we cannot help
