This book is a collection of my experience teaching lower elementary technology over the course of one year. There are lessons, curriculum documents, and thoughts regarding many issues that can arise while teaching technology to young children. This book is intended to be a reference for those who are interested in starting from scratch or for those who are looking for new ideas on how or what to teach regarding information literacy.

What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

Filled with a year's worth of classroom-tested hands-on, minds-on activities, this resource conveniently includes everything both teachers and student need. The grade 2 book is divided into two units: Changing Family and Community Traditions Global Communities **STAND-OUT FEATURES** focuses on the goals of the Ontario Social Studies curriculum adheres to the Growing Success document for assessment, evaluating, and reporting in Ontario schools builds understanding of Indigenous knowledge and perspectives **TIME-SAVING, COST-EFFECTIVE FEATURES** includes the five components of the inquiry model opportunities for self-reflection and activating prior knowledge authentic assessment for, as, and of learning social studies thinking concepts, guided inquiry questions, and learning goals support for developing historical thinking skills access to digital image banks and digital reproducibles (Find download instructions in the Appendix of the book)

Provides sample questions and answers, recommended readings, maps, and activities.

Drawing on her extensive experience as a teacher, the author shares quick, clear, and easy rubrics for accessing students' work. These ideas will help students learn the qualities of a good performance and give parents a detailed picture of their children's progress.

Presents a collection of resources for assessing student performance.

The conservation of biological diversity depends on people's knowledge and actions. This book presents the theory and practice for creating effective education and outreach programmes for conservation. The authors describe an exciting array of techniques for enhancing school resources, marketing environmental messages, using social media, developing partnerships for conservation, and designing on-site programmes for parks and community centres. Vivid case studies from around the world illustrate techniques and describe planning, implementation, and evaluation procedures, enabling readers to implement their own new ideas effectively. Conservation Education and Outreach Techniques, now in its second edition and updated throughout, includes twelve chapters illustrated with numerous photographs showing education and outreach programmes in action, each incorporating an extensive bibliography. Helpful text boxes provide practical tips, guidelines, and recommendations for further exploration of the chapter topics. This book will be particularly relevant to conservation scientists, resource managers, environmental educators, students, and citizen activists. It will also serve as a handy reference and a comprehensive text for a variety of natural resource and environmental professionals.

Technology in the Middle and Secondary Social Studies Classroom introduces pre-service teachers to the research underpinning the effective integration of technology into the social studies curriculum. Building off of established theoretical frameworks, veteran social studies teacher educator Scott Scheuerell shows how the implementation of key technologies in the classroom can help foster higher-level thinking among students. Plentiful, user-friendly examples illustrate how specific educational tools—including games, social media, flipped classrooms, and other emerging technologies—spur critical thinking and foster authentic intellectual work. A rigorous study, Technology in the Middle and Secondary Social Studies Classroom provides a comprehensive, up-to-date research framework for conceptualizing successful, technology-rich social studies classrooms.
