My object is here to instruct Masons as well as others, and not to give them offence. They ask for light. Here is Light! This book is the CLASSIC EXPOSITION OF ENGLISH FREEMASONRY. Originally published in 1825, just twelve years after the organization of the United Grand Lodge of England, this works boasts the most complete collection of early versions of the English masonic rituals available under a single cover. Contains early versions of the three Craft degrees, the Royal Arch, Knight Templar Druids, Mark Man, Mark Master, Architect, Grand Architect, Scotch Master or Superintendent, Secret Master, Perfect Master, Intimate Secretary, Intendant of the Buildings, Past Master, Excellent Masons, Super-Excellent Masons, Nine Elected Knights, Elect of Nine, Peregnon, Elect of Fifteen, Priestly Order of Israel, Irish Master, Noahites or Prussian Knights, Red Cross Sword of Babylon, Knights of the Sword of the East, Red Cross of Rome and Constantine, Knights of the White Eagle or Pelican, Knights of the Eagle and Rosicrucian or Ne Plus Ultra. Illuminating study for Masons and nonmembers.

When Justinian became sole ruler of the Byzantine Empire in A.D. 527, he ordered the preparation of three compilations of Roman law that together formed the Corpus Juris Civilis. These works have become known individually as the Code, which collected the legal pronouncements of the Roman emperors, the Institutes, an elementary student's textbook, and the Digest, by far the largest and most highly prized of the three compilations. The Digest was assembled by a team of sixteen academic lawyers commissioned by Justinian in 533 to cull everything of value from earlier Roman law. It was for centuries the focal point of legal education in the West and remains today an unprecedented collection of the commentaries of Roman jurists on the civil law. Commissioned by the Commonwealth Fund in 1978, Alan Watson assembled a team of thirty specialists to produce this magisterial translation, which was first completed and published in 1985 with Theodor Mommsen's Latin text of 1878 on facing pages. This paperback edition presents a corrected English-language text alone, with an introduction by Alan Watson. There are twenty million acres of lawns in North America. In their current form, these unproductive expanses of grass represent a significant financial and environmental cost. However, viewed through a different lens, they can also be seen as a tremendous source of opportunity. Access to land is a major barrier for many people who want to enter the agricultural sector, and urban and suburban yards have huge potential for would-be farmers wanting to become part of this growing movement. The Urban Farmer is a comprehensive, hands-on, practical manual to help you learn the techniques and business strategies you need to make a good living growing high-yield, high-value crops right in your own backyard (or someone else's). Major benefits include: Low capital investment and overhead costs Reduced need for expensive infrastructure Easy access to markets Growing food in the city means that fresh crops may travel only a few blocks from field to table, making this innovative approach the next logical step in the local food movement. Based on a scalable, easily reproduced business model, The Urban Farmer is your complete guide to minimizing risk and maximizing profit by using intensive production in small leased or borrowed spaces. Curtis Stone is the owner/operator of Green City Acres, a commercial urban farm growing vegetables for farmers markets, restaurants, and retail outlets. During his slower months, Curtis works as a public speaker, teacher, and consultant, sharing his story to inspire a new generation of farmers.

Education for the Future: The Case for Radical Change focuses on the developments in educational systems and the role of teachers and learning institutions in shaping society. The book first ponders on the problems confronting progress in education, including the pressure on schools and teachers to perform according to the dictates of society. The need to develop curriculum in universities that can instill efficient learning for students is also underscored. The text also takes a look at the relationship of literary culture and the productive and distributive activities of the market place. The manuscript focuses on the influence of educational technology in the provision of aids in learning. The text also underscores that the solution to the problems of education in Britain should not be taken individually, but rather it should be treated as part of a larger pattern. The controversy in the establishment of the Gresham College is noted. The book is a dependable reference for readers interested in studying the development, issues, and trends in the educational system of Great Britain.
