This publication makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success, student learning, student support and student engagement. In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton and Saeljoe. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers, as well as parents of prospective university students. It will especially assist students to adapt to the university environment.

On 28 November 2018, the Prime Minister announced an independent review of Australia's vocational education and training (VET) sector to examine ways to deliver skilled workers for a stronger economy. The review was led by the Honourable Steven Joyce, a former New Zealand Minister for Tertiary Education, Skills and Employment. Mr Joyce delivered the final report to the Government in March 2019.

This food-lovers delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

A penetrating look at near-future disruption as truly autonomous vehicles arrive. For decades we have dreamed of building an automobile that can drive itself. But as that dream of autonomy draws close, we are discovering that the driverless car is a red herring. When self-driving technology infects buses, bikes, delivery vans, and even buildings...a wild, woollier, future awaits. Technology will transform life behind the wheel into a high-def video game that makes our ride safer, smoother, and more efficient. Meanwhile, autonomous vehicles will turbocharge our appetite for the instant delivery of goods, making the future as much about moving things as it is about moving people. Giant corporations will link the automated machines that move us to the cloud, raising concerns about mobility monopolies and privatization of streets and sidewalks. The pace of our daily lives and the fabric of our cities and towns will change dramatically as automated vehicles reprogram the way we work, shop, and play. Ghost Road is both a beacon and a warning: it explains where we might be headed together in driverless vehicles, and the choices we must make as societies and individuals to shape that future.

New small business owners are constantly pressured to play a major role in the economic growth of their respected nation. However, revitalizing how individuals think, research, teach, and implement performance strategies to improve the operations of these small businesses is critical to entrepreneurial success. Reshaping Entrepreneurship Education With Strategy and Innovation is an essential reference source that discusses strategies to overcome performance barriers as well as implementation of effective entrepreneurial processes based on a wide range of global issues. Featuring research on topics such as authentic leadership, business ethics, and social entrepreneurship, this book is ideally designed for entrepreneurs, business professionals, scholars, researchers, students, and practitioners seeking coverage on innovative performance operations of small businesses.

From 1952 to 1981, South Africa ' s apartheid government ran an art school for the training of African art teachers at Indaleni, in what is today KwaZulu-Natal. The Art of Life in South Africa is the story of the students, teachers, art, and politics that circulated through a small school, housed in a remote former mission station. It is the story of a community that made its way through the travails of white supremacist South Africa and demonstrates how the art students and teachers made together became the art of their lives. Daniel Magaziner radically reframes apartheid-era South African history. Against the dominant narrative of apartheid oppression and black resistance, as well as recent scholarship that explores violence, criminality, and the hopeless entanglements of the apartheid state, this book focuses instead on a small group ' s efforts to fashion more fulfilling lives for its members and their community through the ironic medium of the apartheid-era school. There is no book like this in South African historiography. Lushly illustrated and poetically written, it gives us fully formed lives that offer remarkable insights into the now clichéd experience of black life under segregation and apartheid.
