They show how archaeology can be used to reveal the position of trenches, dugouts and other battlefield features and to rediscover what life on the Western Front was really like. And they show how individual soldiers are themselves part of the story, for forensic investigation of the war dead is now so highly developed that individuals can be identified and their fate discovered.

This week, the news broke that archaeologists have re-discovered a system of World War One trenches on the Isle of Sheppey, an island just off the coast of North Kent, that had been totally forgotten. What 's remarkable about these trenches is that they were dug in preparation for a German invasion.

Tired of the airbrushed images of archaeologists in TV documentaries? Want the dirt on what REALLY happens on a dig? Paul Bahn has collected dozens of fun tales from the trenches to illuminate what actually occurs when archaeologists go into the field. He reveals startling episodes with dangerous situations, other dangerous archaeologists (sometimes unclothed), dangerous animals large and small, and cans of beer large and small. The stories that don ' t appear in the official reports have made their way into this small, humorous volume. Includes cartoons by noted

In this volume, Tony Pollard and Neil Oliver visit the sites of six major British battles, from Shrewsbury to Culloden, and carry out a full archaeological investigation at each. As they uncover artefacts abandoned in the heat and chaos of battle they closely follow the progress of each engagement and answer key historical questions, sometimes totally revising the accepted version of events. Each chapter is a fully framed investigation and follows an episode of the BBC television series. By using archaeology to unlock the secrets of the past, Tony and Neil prove that soldiers do not pass through fields of conflict like shadows, and

Bureaucratic Archaeology is a multi-faceted ethnography of quotidian practices of archaeology, bureaucracy and science in postcolonial India, concentrating on the workings of Archaeological Survey of India (ASI). This book uncovers an endemic link between micro-practice of archaeology in the trenches of the ASI to the manufacture of

archaeological knowledge, wielded in the making of political and religious identity and summoned as indelible evidence in the juridical adjudication in the highest courts of India. This book is a rare ethnography of the daily practice of a postcolonial bureaucracy from within rather than from the outside. It meticulously uncovers the social, cultural, political and epistemological ecology of ASI archaeologists to show how postcolonial state assembles and produces knowledge. This is the first book length monograph on the workings of archaeology in a non-western world, which meticulously shows how theory of archaeological practice deviates, transforms and generates knowledge outside the Euro-American epistemological tradition.

Miles C. Collier asks: should we really let go of the vast amounts of collective knowledge that resides in automobiles? If not, how can we hold on to it?

Archaeology isn't just about digging in grubby trenches. It is a way of thinking about the past and applying our imagination to the future. Miles C. Collier's remarkable analysis applies this thought process to cars. Miles C. Collier brings an archaeological point of view to the pithy matter of deciding how we understand and treat our automobiles, and how we pass this knowledge to generations to come. This book combines scholarship, pertinent anecdotes, style, and experience to provide a stimulating account of why we
