Often thought of as the quintessential poet of New England, Robert Frost is one of the most widely read American poets of the 20th century. But in spite of his ties to New England, he was born in San Francisco; he published his first book of poetry in England rather than the United States; he matured as a poet during his years abroad; and upon his return to America, he sometimes taught at the University of Michigan and spent many of his winters in Florida. This reference book provides hundreds of alphabetically arranged entries on Frost's poems and illuminates the complexities of his life and writings. Entries are written by expert contributors and conclude with brief citations of additional sources of information. The volume includes a chronology and closes with a bibliography of major studies.

"A poem is best read in the light of all the other poems ever written." So said Robert Frost in instructing readers on how to achieve poetic literacy. George Monteiro's newest book follows that dictum to enhance our understanding of Frost's most valuable poems by demonstrating the ways in which they circulate among the constellations of great poems and essays of the New England Renaissance. Monteiro reads Frost's own poetry not against "all the other poems ever written" but in the light of poems and essays by his precursors, particularly Emerson, Thoreau, and Dickinson. Familiar poems such as "Mending Wall," "After Apple-Picking," "Birches," "Stopping by Woods on a Snowy Evening," "The Road Not Taken," and "Mowing," as well as lesser known poems such as "The Draft Horse," "The Ax-Helve," "The Bonfire," "Dust of Snow," "A Cabin in the Clearing," "The Cocoon," and "Pod of the Milkweed," are renewed by fresh and original readings that show why and how these poems pay tribute to their distinguished sources. Frost's insistence that Emerson and Thoreau were the giants of nineteenth-century American letters is confirmed by the many poems, variously influenced, that derive from them. His attitude toward Emily Dickinson, however, was more complex and sometimes less generous. In his twenties he molded his poetry after hers. But later, after he joined the faculty of Amherst College, he found her to be less a benefactor than a competitor. Monteiro tells a two-stranded tale of attraction, imitation, and homage countered by competition, denigration, and grudging acceptance of Dickinson's greatness as a woman poet. In a daring move, he composes -- out of Frost's own words and phrases -- the talk on Emily Dickinson that Frost was never invited to give. In showing how Frost's work converses with that of his predecessors, Monteiro gives us a new Frost whose poetry is seen as the culmination of an in--tensely felt New England literary experience.

This fascinating reassessment of America's most popular and famous poet reveals a more complex and enigmatic man than many readers might expect. Jay Parini spent over twenty years interviewing friends of Robert Frost and working in the poet's archives at Dartmouth, Amherst, and elsewhere to produce this definitive and insightful biography of both the public and private man. While he depicts the various stages of Frost's colorful life, Parini also sensitively explores the poet's psyche, showing how he dealt with adversity, family tragedy, and depression. By taking the reader into the poetry itself, which he reads closely and brilliantly, Parini offers an insightful road map to Frost's remarkable world.

Though critics traditionally have paid homage to Robert Frost's New England identity by labeling him a regionalist, John Kemp is the first to investigate what was in fact a highly complex relationship between poet and region. Through a frankly revisionist interpretation, he not only demonstrates how Frost's relationship to New England and his attempt to portray himself as the "Yankee farmer poet" affected his poetry; he also shows that the regional identity became a problem both for Frost and for his readers.
