Court Brody knew his assignment to infiltrate a secret militia organization didn't allow for any mistakes. But the stakes became higher when he found himself faced with Sabrina Korbett's former flame who'd stumbled into the wrong place at the worst possible moment. Working undercover, he had to keep his distance and his agenda hidden from the one woman he'd always loved. Then he discovered her secret—she'd never told him he was a father. Although he'd missed his baby's birth, Court vowed to be there for his toddler son forevermore. But with his cover nearly blown, could Court survive long enough to keep his family out of harm's way?

Valuable insights into the potentials, risks, and excitement of establishing a private practice in occupational therapy. This groundbreaking volume provides general and specific ideas to help guide the OT professional who is considering independent practice.

A timely call to reshape government through technology, from Nandan Nilekani and Viral Shah, two leading experts in the field. For many aspects of how our countries are run - from social security and fair elections to communication, infrastructure and the rule of law - technology can play an increasingly positive, revolutionary role. In India, for example, where many underprivileged citizens are invisible to the state, a unique national identity system is being implemented for the first time, which will help strengthen social security. And throughout the world, technology is essential in the transition to clean energy. This book, based on the authors' collective experiences working with government, argues that technology can reshape our lives, in both the developing and developed world, and shows how this can be achieved. Praise for Nandan Nilekani: 'A pioneer . . . one of India's most celebrated technology entrepreneurs' Financial Times 'There is a bracing optimism about Nilekani's analysis . . . which can only be welcome in this age of doom and gloom' Telegraph 'The Bill Gates of Bangalore . . . Nilekani achieves an impressive breadth' Time Nandan Nilekani is a software entrepreneur, Co-founder of Infosys Technologies, and the head of the Government of India's Technology Committee. He was named one of the '100 Most Influential People in the World' by TIME magazine and Forbes' 'Business Leader of the Year', and he is a member of the World Economic Forum Board. Viral B. Shah is a software expert who has created various systems for governments and businesses worldwide.

In principle, no human individual should be rendered stateless: the Universal Declaration of Human Rights stipulates that the right to have or change citizenship cannot be denied. In practice, the legal claim of citizenship is a slippery concept that can be manipulated to serve state interests. On a spectrum from those who enjoy the legal and social benefits of citizenship to those whose right to nationality is outright refused, people with many kinds of status live in various degrees of precariousness within states that cannot or will not protect them. These include documented and undocumented migrants as well as conventional refugees and asylum seekers living in various degrees of uncertainty. Vulnerable populations such as ethnic minorities and women and children may find that de jure citizenship rights are undermined by de facto restrictions on their access, mobility, or security. The Human Right to Citizenship provides an accessible overview of citizenship regimes around the globe, focusing on empirical cases of denied or weakened legal rights. Exploring the legal and social implications of specific national contexts, contributors examine the status of labor migrants in the United States and Canada, the changing definition of citizenship in Nigeria, Germany, India, and Brazil, and the rights of ethnic groups including Palestinians, Rohingya refugees in Bangladesh, Bangladeshi migrants to India, and Roma in Europe. Other chapters consider children's rights to citizenship, multiple citizenships, and unwanted citizenships. With a broad geographical scope, this volume provides a wide-ranging theoretical and legal framework to understand the particular ambiguities, paradoxes, and evolutions of citizenship regimes in the twenty-first century. Contributors: Michal Baer, Kristy A. Belton, Jacqueline Bhabha, Thomas Faist, Jenna Hennebry, Nancy Hiemstra, Rhoda E. Howard-Hassmann, Audrey Macklin, Margareta Matache, Janet McLaughlin, Carolina Moulin, Alison Mountz, Helen O'Nions, Chidi Anselm Odinkalu, Sujata Ramachandran, Kim Rygiel, Nasir Uddin, Margaret Walton-Roberts, David S. Weissbrodt.

An integrated national identification (ID) system offers a means to fast-track the development

Where To Download E Aadhar Card Uidai Gov In Resident Uidai Net In

process by providing the most efficient way to identify people in developing countries. This report seeks to help governments assess the maturity of a country's ID system and integrate it with development activities. A maturity model for a country's ID management is developed and applied to seven countries in Asia to assess the maturity of their ID systems. This report also provides a way forward for multilateral institutions---including ADB---to make the best use of ID systems in their operations.

Developing economies around the world must balance fast growth with traditional values to achieve the greatest success. Issues related to rural innovation, knowledge management, and emerging technologies are at the forefront of every developing country's concerns. Promoting Socio-Economic Development through Business Integration builds on available literature in the field of socio-economic development in developing countries, providing further research opportunities in this field. Research scholars, academics, policymakers, government officials, and more will find this book to be a crucial source of knowledge to their respective disciplines.

This extraordinary book, written by leading players in a burgeoning technology revolution, is about the merger of finance and technology (fintech), and covers its various aspects and how they impact each discipline within the financial services industry. It is an honest and direct analysis of where each segment of financial services will stand. Fintech: The New DNA of Financial Services provides an in-depth introduction to understanding the various areas of fintech and terminology such as AI, big data, robo-advisory, blockchain, cryptocurrency, InsurTech, cloud computing, crowdfunding and many more. Contributions from fintech innovators discuss banking, insurance and investment management applications, as well as the legal and human resource implications of fintech in the future.

This book explores the interconnected ways in which the control of knowledge has become central to the exercise of political, economic, and social power. Building on the work of International Political Economy scholar Susan Strange, this multidisciplinary volume features experts from political science, anthropology, law, criminology, women's and gender studies, and Science and Technology Studies, who consider how the control of knowledge is shaping our everyday lives. From "weaponised copyright" as a censorship tool, to the battle over control of the internet's "guts," to the effects of state surveillance at the Mexico-U.S. border, this book offers a coherent way to understand the nature of power in the twenty-first century.

This book constitutes the thoroughly refereed proceedings of three international workshops held in Rome, Italy, in June 2019, associated with the 31st International Conference on Advanced Information Systems Engineering, CAISE 2019. These workshops were: COGNISE, The 7th International Workshop on Cognitive Aspects of Information Systems Engineering KET4DF, First International Workshop on Key Enabling Technologies for Digital Factories BIOC&FAISE, Joint Workshop on Blockchains for Inter-Organizational Collaboration and Flexible Advanced Information Systems The total of 19 papers presented in this volume were carefully reviewed and selected from 39 submissions.

This comprehensive book provides a detailed survey and practical examination of a wide range of legal and regulatory topics in HealthTech. Key features include: " Analysis of the impact of emerging innovations on the accessibility, efficiency and quality of healthcare and its effects on healthcare providers " Examination of artificial intelligence, blockchain and digital identity applications in healthcare, alongside associated regulatory challenges " Guidance on the financial requirements of healthcare start-ups at different stages of growth and various collaboration and partnership models in the HealthTech market " Discussion of the major
