Engineers from  
all disciplines  
eventually  
encounter  
computer and

instrumentation,  
which require at  
least a basic

material. In many cases, courses for non-electrical engineers, or non-EEs, have presented watered-down classical EE material, resulting in unpopular courses that students hate

and senior  
faculty members  
understandingly  
avoid teaching.

To remedy this  
situation—and  
create more well-

authors focus on  
the true EE  
needs of non-  
EEs, as
