Flynn P.C., Financial Management for Engineers, Fourth Edition, Castle Rock, Edmonton, Canada, 2009 (ISBN). Ghafoori E. and Flynn P.C., The Economics of Energy from Animal Manure, VDM, Saarbrucken, Germany, 2008 (ISBN 978-3-8364-9545-5).

This volume specifically examines current concerns about imprisoned fathers and highlights best practices with a group of children and parents who present significant vulnerabilities. It brings together contemporary works in this area, to share and consolidate knowledge, to encourage comparisons and collaborations across jurisdictions, and to stimulate debate, all with the aim of furthering knowledge and improving practice in this area. Although there is considerable focus on imprisoned mothers, there is limited knowledge or understanding of the needs, experiences, or effective responses to imprisoned fathers and their children, despite men making up the vast majority of the prison population. The ongoing and negative impact of parental incarceration on children is well documented, and includes emotional and behavioural consequences, marginalisation, and stigma, as well as financial and social stresses. However, understanding of these processes, and, importantly, what can assist children and families, is poor. This book seeks to add to the understanding of paternal imprisonment by providing an in-depth exploration of how the arrest, detention, and experiences of fathers during imprisonment can affect their ability to parent and meet the needs of their children. This book was originally published as a special issue of Child Care in Practice.

Addressing the specific needs of engineers, scientists, and technicians, this reference introduces engineering students to the basics of marketing, human resource management, employment relations, personnel management, and financial management. This guide will help engineering students develop a sense for business and prepare them for the commercial and administrative dealings with customers, suppliers, contractors, accountants, and managers.

Redefining Success: Integrating Sustainability into Management Education advocates incorporating sustainability concepts that go beyond the financial "bottom line" into management education and business practice. Highlighting the UN Global Compact (UNGC), the Principles for Responsible Management Education (PRME) and the Sustainability Development Goals (SDGs), it explores conceptual and practical issues, presents case studies and other empirical evidence, and offers solutions that will both encourage and assist management educators in the incorporation of sustainability into their courses and research. incorporating sustainability into their courses and research. Written by 34 individuals from 17 countries, the book addresses these topics from a variety of theoretical, disciplinary, geographic and organizational perspectives. The authors demonstrate how management educators, collaborating with business and civic organizations, can be change agents for a better world. Written for educators, scholars and business practitioners, the volume concludes with lessons learned, challenges encountered, and implications for responsible management education.

With flair and an originality of approach, Crundwell brings his considerable experience to bear on this crucial topic. Uniquely, this book discusses the technical and financial aspects of decision-making in engineering and demonstrates these through case studies. It's a hugely important matter as, of course, engineering solutions and financial decisions are intimately tied together. The best engineers combine the technical and financial cases in determining new solutions to opportunities, challenges and problems. To get your project approved, no matter the size of it, the financial case must be clear and compelling. This book provides a framework for engineers and scientists to undertake financial evaluations and assessments of engineering or production projects.
