FT 3D - Scratch Build | Flite Test
We wanted to be sure the FT 3D was the best it could be before we offered it in our web store as a speed build kit.. The speed build kit and free build plans have been updated to feature key design characteristics based on the feedback from you and our own tests.. Arron Bates stopped by to review the final version of our speed build foam board swappable 3D airplane and to give us additional ...

FT 3D - Speed Build Swappable | Flite Test
Here are my plans for a 120% size FT3D. I think it hits the sweet spot of size, weight and power, and it flies easily on common 3s-2200 batteries. This plane is 20% larger than the original, giving it 44% more wing area, enabling it to loft a heavier motor and battery while still maintaining a very light wing loading.

A comprehensive collection of cyberculture pioneer Gareth Branwyn's best work, Borg Like Me spans a 30-year writing career. The book covers Branwyn's coming of age in a commune, his involvement in the 90s zine publishing scene, his tenure at influential cyber arts and culture mags Mondo 2000, bOING bOING, Wired, and his eight years at MAKE, spearheading the growing maker movement. Previously published material is woven throughout with Branwyn's unabashedly honest commentary, personal anecdotes, and original essays. Read about the smart-druggies behind Mondo 2000, impersonating Billy Idol in cyberspace (for Billy Idol), the making of the iconic early 90s hypermedia book, Beyond Cyberpunk!, and Branwyn going positively Phillip K. Dick after a heart attack and a bad blood transfusion. Borg Like Me is a smart, passionate, intense trip along the bleeding edges of art, technology, and culture at the turn of the 21st century.

The American edition of the revelatory Swedish book Spotify Untold, the basis of the new Netflix Original series slated for 2022! "Two excellent Swedish journalists recount the historic rise of the company that changed modern music not just as a riveting business tale, but as a lesson in tech geopolitics. Spotify's Daniel Ek shows why Silicon Valley does not always win."—David Kirkpatrick, New York Times bestselling author of The Facebook Effect Steve Jobs tried to stop this moment from ever happening. Google and Microsoft made bids to preempt it. The music industry blocked it time and again. Yet, on a summer's eve in 2011, the whiz kid CEO of a Swedish start-up celebrated his company's US launch. In the midst of the Apple-Android tech war and a music label crusade against piracy and illegal downloading, Spotify withdrew the battle lines, sent shockwaves through Silicon Valley, and got the headline executives at Universal, Sony, and Warner to sign with its "free-mium" platform. In The Spotify Play, now adapted into an upcoming Netflix Original series, Swedish investigative tech journalists Sven Carlsson and Jonas Leijonhufvud, who covered the company from its inception, draw upon hundreds of interviews, previously untapped sources, and in-depth reporting on figures like Mark Zuckerberg, Sean Parker, Steve Jobs, Taylor Swift, Jay-Z, Pony Ma Huateng, and Jimmy Iovine. They have captured the riveting David vs. Goliath story of a disruptive innovator who played the industry giants in a quest to revolutionize the consumption of sound, building today's largest online source of audio, with more than 50 million songs, one million-plus podcasts, and over 300 million users.

Now a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's The Fault in Our Stars, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

Presents an electronic version of "On the Frontier: Flight Research at Dryden, 1946-1981," published by the Scientific and Technical Information Branch of the U.S. National Aeronautics and Space Administration (NASA) in Washington, D.C. Examines flight research at the Hugh L. Dryden Flight Research Center.

Features over 100 great how-to building and finishing techniques along with step-by-step photos and illustrations. Includes CG locators, working with balsa, Nyrod installation, construction, tool ideas, and much more.

Join Sally and Jack on an extraordinary air race filled with hot air balloons, flying ice lollies and bubble gum rockets. But will their fantastical flying machine speed them into first place, or will the devious cheater Baron Von Bang Bang trick his way into the lead? A colourful, topsy-turvy airship adventure from an exciting new illustrator. With spinning, twirling, lift-the-flap pages and an amazing pop-up finale!
