Carlos is a lover of women. He loves them passionately, intensely, and deeply, and he tries to be sincere and tender. He is sensual and caring, generous in his affection and attention, and prone to fall ardently in love. His sensual adventures, filled with the pursuit of beauty and every possible hedonistic pleasure, take him to three different countries. In each country, he loses his heart on the perpetual quest for the elusive love of his life. He knows that each

woman he romances is ready to be loved, and it ' s up to him to unlock the mystery of her inner heart if he desires access to more. But on his lust-fueled quest, he finds an unexpected surprise in an older woman. Has he finally found the one woman he could love forever in this sophisticated and beautiful woman he meets? Is she the woman of his dreams, his fantasies, his heart ' s desire? Only time will tell. The heart wants what the heart wants, and Carlos knows just how far he will go to see his most fervent dreams come true.

Featuring recipes drawn from familiar classic dishes and new favorites, Laura Lea's new book, *Simply Laura Lea*, offers delicious home-cooked food without sacrificing healthy eating.

"This is the first substantial history of two industries that have played a huge role in the social and economic history of Scotland. Covering over 300 years of labour and working conditions, it focuses on the men and boys who mastered heat and fire to make and shape iron in furnaces, forges, mills and foundries before, during, and after the Industrial Revolution. It also concentrates on working lives spent in steel production from the beginning of the industry in the 1870s until its demise in the 1990s, focusing on aspects such as technological changes, employer/worker relations and the role of the trades unions."--BOOK JACKET.

Finalist for 2009 The Council on Botanical & Horticultural Libraries Literature Award! A Fresh Look at Taxonomy The most fundamental of all biological sciences, taxonomy

underpins any long term strategies for reconstructing the great tree of life or salvaging as much biodiversity as possible. Yet we are still unable to say with any certainty how many species are living on the earth. The New Taxonomy describes how a confluence of theory, cyberinfrastructure, and international teamwork can meet this unprecedented research challenge and marks an emerging field, cybertaxonomy. Taxonomy Meets the Challenges of the Biodiversity Crisis An in-depth discussion of the future of descriptive taxonomy, the book examines the efforts of several international groups to catalog the world ' s biodiversity and make it accessible. An answer to Julien Huxley ' s The New Systematics, the book marks the beginning of an upward trajectory of taxonomy to meet the unprecedented challenges of the biodiversity crisis. Contemporary taxonomists reclaim the unique mission, goals, and importance of taxonomy as an independent science. They cover technologies such as DNA evidence and its applications, computer-assisted species identification, digital morphology, and E-typification. The book also provides insight into effective ways of organizing taxonomic information and discusses what benefits can be leveraged from a rapid growth of taxonomic knowledge. A Vision and A Strategy for the Future Not much has changed since E.O. Wilson pointed out how little we know of Earth ' s species in 1985. This book offers a vision and a strategy for changing all that. The first current, unapologetic look at morphology and descriptive taxonomy that points out their incredible importance to science and society, this book frames one of the most constructive responses to biodiversity crises. It is a call to action for the taxonomy and museum communities to come together and to organize, plan, innovate, and initiate the most ambitious period of exploration in the long history of taxonomy.

Silver Winner, ForeWord Magazine Book of the Year, History From September 1941 until January 1944, Leningrad suffered under one of the worst sieges in the history of warfare. At least one million civilians died, many during the terribly cold first winter. Bearing the brunt of this hardship—and keeping the city alive through their daily toil and sacrifice—were the women of Leningrad. Yet their perspective on life during the siege has been little examined. Cynthia Simmons and Nina Perlina have searched archival holdings for letters and diaries written during the siege, conducted interviews with survivors, and collected poetry, fiction, and retrospective memoirs written by the *blokadnitsy* (women survivors) to present a truer picture of the city under siege. In simple, direct, even heartbreaking language, these documents tell of lost husbands, mothers, children; meager rations often supplemented with sawdust and other inedible additives; crime, cruelty, and even cannibalism. They also relate unexpected acts of kindness and generosity; attempts to maintain cultural life through musical and dramatic performances; and provide insight into a group of ordinary women reaching beyond differences in socioeconomic class, ethnicity, and profession in order to survive in extraordinary times.

"The first woman in the world to exceed 300 mph in a dragster"--Cover.
