Tadano's new AML-C is easy to use. It allows the operator to simultaneously monitor: boom angle, boom length, operating pressure of elevating cylinder, the extended width of the outriggers, slewing position, rated lifting capacity and present hook weight. All of this enables the AML-C to move easily through lifting capacity changes without changing configurations and codes to make a lift ...

With its ability to manoeuvre in tight spaces and safe driving conditions, this is the ideal crane for your next project. Features include: 24m boom Two-stage, under slung hydraulic luffing jib […]

With many updates and additional exercises, the second edition of this book continues to provide readers with a gentle introduction to rough path analysis and regularity structures, theories that have yielded many new insights into the analysis of stochastic differential equations, and, most recently, stochastic partial differential equations. Rough path analysis provides the means for constructing a pathwise solution theory for stochastic differential equations which, in many respects, behaves like the theory of deterministic differential equations and permits a clean break between analytical and probabilistic arguments. Together with the theory of regularity structures, it forms a robust toolbox, allowing the recovery of many classical results without having to rely on specific probabilistic properties such as adaptedness or the martingale property. Essentially self-contained, this textbook puts the emphasis on ideas and short arguments, rather than aiming for the strongest possible statements. A typical reader will have been exposed to upper undergraduate analysis and probability courses, with little more than Itô-integration against Brownian motion required for most of the text. From the reviews of the first edition: "Can easily be used as a support for a graduate course ... Presents in an accessible way the unique point of view of two experts who themselves have largely contributed to the theory" - Fabrice Baudouin in the Mathematical Reviews "It is easy to base a graduate course on rough paths on this ... A researcher who carefully works her way through all of the exercises will have a very good impression of the current state of the art" - Nicolas Perkowski in Zentralblatt MATH

Chart Patterns booklet is designed to be your quick source for identifying chart patterns to help you trade more confidently. This book introduces & explains 60+ patterns that you are bound to see in Stocks, Mutual Funds, ETFs, Forex, and Options Trading. With this book, you will not need to flip through hundreds of pages to identify patterns. This book will improve the way you trade. Unlike other Technical Analysis books, this Chart pattern book will help you master Charting & Technical Analysis by making it simple enough to understand & use on a day to day basis.

Christmas Word Search Puzzle Activity Book For Kids: Beautiful Christmas Word Search For Kids. Do you love word searches? This is a fun-filled Christmas themed word search book for you! This easy-to-read collection of 47 large-print word searches is designed to get you into the Christmas holiday spirit! In this 8.5 x 11 large-print book, you will find: 47 fun and moderately challenging puzzles with answer sheet A great way to enhance your cognition, memory, and sharpness A variety of Christmas and Winter themed word search puzzles to boost your vocabulary and knowledge of the festive holiday! Easy-to-read pages with large-font and some entertaining layouts for hours of word search fun! Relaxation as you play through this exciting Christmas word search any time of the year. Solutions are also provided in LARGE font. This activity book features fun, moderately challenging puzzles with words that appear backwards and diagonally.

Day Bang is a 201-page book that teaches you how to pick up women during the day, primarily in a coffee shop, clothing store, bookstore, grocery store, subway, or on the street. It contains 51 openers, 23 long dialogue examples with commentary, and dozens of additional lines that teach by example. Day Bang includes... -The optimal day game mindset that leads to the most amount of success-An easy mental trick to prevent your brain from going into a flight-or-fight response when it's time to approach a woman you're attracted to-A detailed breakdown of how to use the "elderly opener," an easy style of approach that reliably starts conversations with women-2 ways to tell if a girl will be receptive to your approach-How to avoid the dreaded "interview vibe"-10 common mistakes guys make that hurt their chances of getting a number Day Bang shares tons of tips and real examples on having successful conversations. It teaches you... -How to use my bait system to get the girl engaged and interested in you-How to segue out of the initial opening topic into a more personal chat where you'll get to know the girl on a deeper level-How to take the interesting things you've done (your accomplishments, hobbies, and experiences) and morph them into bait hooks that gets the girl intrigued enough to want to go out with you-My "Galnuc" method to seamlessly get a girl's number-An easy hack at the end of your interactions that will reduce the chance of a flake and prime the girl for going out with you-Ways to open up a conversation on a girl who isn't giving you much to work with Day Bang goes into painstaking detail on how to approach women in a variety of common environments... -How to open a girl in coffee shops when she has a book, laptop, mp3 player, cell phone, research paper, crossword or Sudoku puzzle, or nothing at all-Two methods for approaching a girl on the street, depending on if she's moving or not, with a diagram to explain all the approach variations-How to approach in a retail store or mall environment, with openers to use on customers or sales clerks-How to approach in bookstores, with specific tips on how to customize your approaches in the cafe, magazine section, or general book aisles-How to meet women in public transportation, on both the bus and subway-How to meet women in grocery stores-How to approach girls in secondary venues like a beach, casino, concert, gym, hair salon, handicraft fair, museum, art show, park, public square, or wine festival Dozens of additional topics are logically organized into 12 chapters... -Preparation. How to reduce your approach anxiety-Opening. How to deliver your opener in a way that doesn't scare women away-Rambling. How to have conversations that make women interested in you-Closing. How to get a number in a way that reduces the chance she'll flake-The Coffee Shop. How to pick up in coffee shops and cafes-The Street. How to pick up outdoors-The Clothing Shop. How to pick up in retail shops, malls, and big box stores-The Bookstore. How to pick up in bookstores-Public Transportation. How to pick up in the bus, subway, or long distance transportation-The Grocery Store. How to pick up in grocery stores-Other Venues. How to pick up just about anywhere else women can be found-Putting It All Together. How to maximize your day game potential The lessons taught in this 75,000 word, no-fluff textbook will help you meet women during the day. If you need tips on what to do after getting her number, consult my other book Bang, which contains an A-to-Z banging strategy. Day Bang focuses exclusively on daytime approaching.

"This collection of essays brings together some of the finest pieces Hitchens published over the last two decades for the first time in one book, addressing with characteristic wit and erudition the subjects he is best known for, including: the case against God, faith and religious observance; the case for intervention in Iraq; indictments of towering political figures like Bill and Hillary Clinton, Tony Blair, and Henry Kissinger; and celebrations of the writers and thinkers whose work meant most to him"--

What happened at 10 Rilllington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In A House To Remember, she explains why.

This monograph is an original study of what is commonly termed the American "myth of Ham". It examines black and white Americans' recourse to the biblical character of Ham as a cultural strategy for explaining racial origins. Previous studies in the area have been restricted to associating the Hamitic idea with pro-slavery arguments, whereas the thesis of this project reveals a fundamental irony: black American Christians who reinforced the meanings of illegitimacy by appealing to Ham as the ancestor of the race.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.
