features, and best practices of the ISE solution. It begins by reviewing today's business case for identity solutions. Next, you walk through ISE foundational topics and ISE design. Then you explore how to build an access security policy using the building blocks of ISE. Next are the in-depth and advanced ISE configuration sections, followed by the troubleshooting and monitoring chapters. Finally, we go in depth on the new TACACS+ device administration solution that is new to ISE and to this second edition. With this book, you will gain an understanding of ISE configuration, such as identifying users, devices, and security posture; learn about Cisco Secure Access solutions; and master advanced techniques for securing access to networks, from dynamic

In *Gut Feminism* Elizabeth A. Wilson urges feminists to rethink their resistance to biological and pharmaceutical data. Turning her attention to the gut and depression, she asks what conceptual and methodological innovations become possible when feminist theory isn't so instinctively antibiological. She examines research on antidepressants, placebos, transference, phantasy, eating disorders and suicidality with two goals in mind: to show how pharmaceutical data can be useful for feminist theory, and to address the necessary role of aggression in feminist politics. *Gut Feminism's* provocative challenge to feminist theory is that it would be more powerful if it could attend to biological

What shall we do as managers when we must operate in unstable times when the reassurance we desire is absent and the uncertainty of today promises an unpredictable tomorrow?" Corporate management is living through the Chinese curse of 'may you live in interesting times' as they contemplate their exposure both directly and indirectly to the almost unprecedented turbulence in the global markets. This short book explains how to approach management in turbulent operating conditions and what to do if your company encounters distress. It is based around turnaround specialist Anthony Holmes's 7 principles of crisis management.

NCIS officers Mitch Robbins, former Navy Seal, and Jake Bradley, MIT grad, now computer specialist, have shared everything since they were children, including women. Now they're sharing an assignment, guarding Tessa Williams, the civilian scientist in charge of a massive military project. Mitch and Jake's orders are simple: Keep Tessa safe. But they'll soon find that there's nothing simple about guarding "this" little spitfire. Tessa Williams is the one woman from their past that got away. The one woman they'd both been in love with and now they both want back. Together, they seduce Tessa. But in the end, she will have to decide which one she wants. The only problem is, she wants them both.
