Teaching fundamental design concepts and the challenges of emerging technology, this textbook prepares students for a career designing the computer systems of the future. In-depth coverage of complexity, power, reliability and performance, coupled with treatment of parallelism at all levels, including ILP and TLP, provides the state-of-the-art training that students need. The whole gamut of parallel architecture design options is explained, from core microarchitecture to chip multiprocessors to large-scale multiprocessor systems. All the chapters are self-contained, yet concise enough that the material can be taught in a single semester, making it perfect for use in senior undergraduate and graduate computer architecture courses. The book is also teeming with practical examples to aid the learning process, showing concrete applications of definitions. With simple models and codes used throughout, all material is made open to a broad range of computer engineering/science students with only a basic knowledge of hardware and software.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

Cambridge Low Price Editions are reprints of internationally respected books from Cambridge University Press. Advanced Chemistry covers the syllabuses of all the main examining boards offering A-level chemistry, and contains material suitable for students beginning undergraduate study. The author places the subject in context by discussing the nature and the wider implications and applications of chemistry. The material is divided into four parts: physical, industrial, inorganic and organic chemistry. Each part is divided into short self-contained units, each of which develops a set of well-defined themes or concepts. Students may work through the units in order, or individual units may be used separately.

Gathers poems written by the eighth-century Chinese poet, and briefly discusses his life and influence on Asian poetry

What would road rage in Beverly Hills look like? From the whimsical perspective of The Other Coast creator Adrian Raeside, it would involve a prim-and-proper hurling of a jar of Grey Poupon at the offending driver. The Other Coast: Road Rage in Beverly Hills is the first collection of Adrian Raeside's strip featuring his off-kilter view of contemporary life. Raeside's lighthearted look at culture, politics, fashion, society, and life in general is both insightful and hilarious. Whether it's taking a clever poke at our obsession with wireless phones, our inability to maintain a workout program, or the witty banter of married life, The Other Coast is a bastion of original thinking, wry wit, and out-loud laughs. Much of the humor comes at the expense of Toulouse, the eccentric screenwriter, and his cause-seeking wife, Vicki. But the strip also features a colorful cast of repair people, kids, contractors, tech-support goons, agents, pets, and much more. Those enjoying strips that provide more than the "same ol' schtick" are sure to relish a visit to The Other Coast, where folks aren't deep enough to be shallow.
