International crime and justice is an emerging field that covers international and transnational crimes that have not been the focus of mainstream criminology or criminal justice. This book examines the field from a global perspective. It provides an introduction to the nature of international and transnational crimes and the theoretical perspectives that assist in understanding the relationship between social change and the waxing and waning of the

crime opportunities resulting from globalization, migration, and culture conflicts. Written by a team of world experts, it examines the central role of victim rights in the development of legal frameworks for the prevention and control of transnational and international crimes. It also discusses the challenges to delivering justice and obtaining international cooperation in efforts to deter, detect, and respond to these crimes.

This widely-acclaimed series provides highly practical guides aimed to help those teaching biology, chemistry, physics and scientific enquiry. Teaching Secondary Biology is a practical guide to teaching biology to 11-16 year olds. Chapters are subdivided into topics and for each topic the book includes: previous knowledge, a suggested teaching sequence, further activities and enhancement ideas.

Essentials of Human Nutrition has already established itself as the most reliable and accessible textbook for students embarking on courses in human nutrition. This new edition contains a new chapter on functional foods.

For much of the twentieth century, the definition of success for most community colleges revolved around student retention and graduation. This definition no longer works—if it ever did. In *Student Success in the Community College: What Really Works?* respected community college leaders, researchers, and innovators argue that student success is about redesigning community colleges in a manner that is consistent with each college's mission, goals, student population, and resources. Concluding that there is no one-size-fits-all approach to increasing student

success, chapter authors analyze national, state, and regional efforts to increase student success; identify principles institutions can use to frame student success initiatives; and outline specific actions community colleges can take to increase student—and institutional—success. *Student Success in the Community College: What Really Works?* also provides concrete examples of effective student success initiatives in a variety of community college settings.

Also includes some descendants of Otto Beery. He was born in 1859 at Langnau, Berne, Switzerland and immigrated to the United States ca. 1885. He married Mary McCleary in 1890 at Passaic, New Jersey. They had five children, 1891-1906. He died in 1918 at Wallington, New Jersey.

CHEMISTRY FOR ENGINEERING STUDENTS, connects chemistry to engineering, math, and physics; includes problems and applications specific to engineering; and offers realistic worked problems in every chapter that speak to your interests as a future engineer. Packed with built-in study tools, this textbook gives you the resources you need to master the material and succeed in the course.
