In *Leading Matters*, current Chairman of Alphabet (Google's parent company), former President of Stanford University, and "Godfather of Silicon Valley," John L. Hennessy shares the core elements of leadership that helped him become a successful tech entrepreneur, esteemed academic, and venerated administrator. Hennessy's approach to leadership is laser-focused on the journey rather than the destination. Each chapter in *Leading Matters* looks at valuable elements that have shaped Hennessy's career in practice and philosophy. He discusses the pivotal role that humility, authenticity and trust, service, empathy, courage, collaboration, innovation, intellectual curiosity, storytelling, and legacy have all played in his prolific, interdisciplinary career. Hennessy takes these elements and applies them to instructive stories, such as his encounters with other Silicon Valley leaders including Jim Clark, founder of Netscape; Condoleezza Rice, former U.S. Secretary of State and Stanford provost; John Arrillaga, one of the most successful Silicon Valley commercial real estate developers; and Phil Knight, founder of Nike and philanthropist with whom Hennessy cofounded Knight-Hennessy Scholars at Stanford University. Across government, education, commerce, and non-profits, the need for effective leadership could not be more pressing. This book is essential reading for those tasked with leading any complex enterprise in the academic, not-for-profit, or for-profit sector.

"Anything special happening today, Daddy?" Patricia asked, hoping it would help him remember. "Nope, honey. Today's about the same as any other day, I'd say." Some birthday! Where was the cake with all the candles, the brightly wrapped present, and the family singing "happy birthday" all together? Not only had the festivities apparently been forgotten, but Dad suggests a trip to one of the scariest places on earth -- home of the Clay Pit Bottoms Monster! With a sparkle of mischief, Patricia Polacco's bold, expressive pictures tell how a certain little girl has the spookiest, most exciting, funniest, and best birthday ever.

This monograph is based on four lectures which the venerable and distinguished British composer delivered at Cornell University. He explains the nature of rhythm, the relation of folk music to the composer, why we make music, the social foundations of music, and more.
