without soil.? If yes,
then keep reading.

Hydroponics is a system of agriculture where crops are grown in nutrient solutions combined with water. So by this definition, you do not need to dirty your hands in mud or earth as the case may be to produce healthy crops.

Online Library

Natural Pest

Instead, the plants make use of an inert solution medium as well as either perlite, peat moss, clay pellets, or vermiculite for plant production. Hydroponics has a lot of benefits and leverage over conventional soil plant production, ranging from the production of crops
