For more than two thousand years, Ethiopia's ox-plow agricultural system was the most efficient and innovative in Africa, but has been afflicted in the recent past by a series of crises: famine, declining productivity, and losses in biodiversity. James C. McCann analyzes the last two hundred years of agricultural history in Ethiopia to determine whether the ox-plow agricultural system has adapted to population growth, new crops, and the challenges of a modern political economy based in urban centers. This agricultural history is set in the context of the larger environmental and landscape history of Ethiopia, showing how farmers have integrated crops, tools, and labor with natural cycles of rainfall and soil fertility, as well as with the social vagaries of changing political systems. McCann traces characteristic features of Ethiopian farming, such as the single-tine scratch plow, which has retained a remarkably consistent design over two millennia, and a crop repertoire that is among the most genetically diverse in the world. *People of the Plow* provides detailed documentation of Ethiopian agricultural practices since the early nineteenth century by examining travel narratives, early agricultural surveys, photographs and engravings, modern farming systems research, and the testimony of farmers themselves, collected during McCann's five years of fieldwork. He then traces the ways those practices have evolved in the twentieth century in response to population growth, urban markets, and the presence of new technologies.

Hailed as a classic when initially published in 1961, *Eat Not This Flesh* was the first book that explored, from a historical and cultural perspective, taboos against eating certain kinds of flesh. Frederick J. Simoons's research remains original and invaluable, the only attempt of its kind to reconstruct the origin and spread of food avoidances while challenging current Western explanations. In this expanded and updated edition, Simoons integrates new research as he examines the use and avoidance of flesh foods--including beef, pork, chicken, and eggs, camel, dog, horse, and fish--from antiquity to the present day. Simoons suggests that Westerners are too ready, even in the absence of supporting evidence, to cite contemporary thinking about disease and environmental factors to explain why certain cultures avoid particular kinds of meat. He demonstrates how historical and archaeological evidence fails to support such explanations. He examines the

origin of pork rejection in the Near East, explores the concept of the sacred cow in India and the ensuing ban on beef, and reveals how some African women abstain from chicken and eggs, fearing infertility. While no single explanation exists for food taboos, Simoons finds that the powerful, recurrent theme of maintaining ritual purity, good health, and well-being underlies diet habits. He emphasizes that only a full range of factors can explain eating patterns, and he stresses the interplay of religious, moral, hygienic, ecological, and economic factors in the context of human culture. Maps, drawings, and photos highlighting food avoidance patterns in Africa, Asia, Europe, and the Pacific provide additional information throughout the book.

An ideal resource for anyone interested in learning about Ethiopia, this accessible, single-volume work provides all-encompassing and up-to-date coverage of the ancient and diverse cultures of Africa's second-most populated nation. • Presents comprehensive, current coverage of Ethiopia that includes the latest archaeological findings and socio-economic and political developments as well as previously overlooked topics such as gender, slavery, and migration • Addresses the major famines in Ethiopia in the 1980s that led to the deaths of thousands of people and served as the reason many Westerners first became aware of this African nation • Describes all of the major ethnic groups of Ethiopia, including the Afar, Amhara, Oromo, Sidamo, Somalis, and Tigray

This study examines plants associated with ritual purity, fertility, prosperity and life, and plants associated with ritual impurity, sickness, ill fate and death. It provides detail from history, ethnography, religious studies, classics, folklore, ethnobotany and medicine.

Ethiopia is one of the world's oldest countries; its Rift Valley may be the location where the ancestors of humankind originated more than four million years ago. With a population of 67 million people today, it is the third most populous country on the African continent after Nigeria and Egypt. It is the source of 86 percent of the water reaching the Aswan Dam in Egypt, most of it carried by the amazing Blue Nile. Ethiopia offers major historical sites such as the pre-Christian palace at Yeha, the stele and tombs of the old Kingdom of Axum, and the rock-carved churches of Lalibela. For anyone interested in Ethiopia, this historical dictionary, through its individual and carefully cross-referenced entries, captures the importance and intrigue of this truly significant African nation. Historical Dictionary of Ethiopia appeals to all levels of readers, providing entries for each of Ethiopia's 85 ethnic groups and covering a broad range of cultural, political, and economic topics. Readers interested in the cultural aspects or who are planning to visit Ethiopia will find a wealth of entries on art, literature, handicrafts, music, dance, bird life, geography, and historic tourist sites. Practitioners in government and non-governmental organizations will find entries on pressing economic, social, and political issues such as HIV/AIDS, female circumcision, debt, human rights, and the environment. The important historical role of missionaries and the combination of conflict and cooperation between Christians and Muslims in the region are also issues reviewed. And, finally, many of the entries highlight relations between Ethiopia and her neighbors-Eritrea, Somalia, Somaliland, Djibouti, Kenya, and Sudan. In the bibliography, considerable emphasis has been placed on including both new and old materials covering all facets of Ethiopia, organized for easy identification by areas of major interest.
