It has, improbably,
been called
uncommonly lucid,
even riveting by The
New York Times, and
it was a finalist for the

honor. It is a literally
chilling read,

Especially in its
minute-by-minute
description of the
events of the morning
of 9/11 inside the
Twin Towers. It is The
9/11 Commission
Report, which was,
before its publication,
perhaps one of the
most anticipated
government reports of
all time, and has been
since an unlikely

bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went

right (the heroic
response of
emergency services
and self-organizing
civilians), and how to
avert similar future
attacks. Highlighting
evidence from the
day, from airport
surveillance footage
of the terrorists to
phone calls from the
doomed flights, and
offering details that

have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it

is nevertheless an essential record of one of the most transformational events of modern times.

This volume is the first to offer a comprehensive, research-based, multi-faceted look at issues in early algebra. In recent years, the

Teachers of

recommended that
algebra become a

throughout the K-12
curriculum, and the

recommended that
algebra be “the initial

This book provides a rationale for a stronger and more sustained approach to algebra in school, as well as concrete examples of how algebraic reasoning may be developed in the early grades. It is

The contributors to

have been at the

the existing early grades mathematics curriculum. They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings.
