Crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

Introductory work on geological maps by Gertrude Elles (1872-1960), one of Britain's first professional female geologists and university lecturers. In the introduction, Elles writes that this volume is "based mainly upon the notes for a course of lectures and practical work given to many successive generations of Girton and Newnham students. I was asked to put

In today's pop culture, many use Darwin's teachings in an attempt to explain away the profound marvel of our existence as nothing more than the product of random accident. The Gilligan Principle by Steve Lee offers a critical rebuff to this philosophy, detailing both the impossible technical problems facing the formation of the many complex components of life by random means, while also discussing the detrimental effects this modern philosophy has had on society as a whole. Drawing upon fundamental scientific principles, hard logic and a range of discoveries that demonstrate the remarkable sophistication and elegance found in a living cell (e.g. DNA, "the world's smallest motor", hemoglobin, etc.), Lee underscores

the impossibility of this oft quoted, yet vacuous "explanation" for life. Blending Scientific research with social commentary, The Gilligan Principle goes beyond the technical problems confronting Darwinism, focusing on the alarming rise in social dysfunction precipitated by a culture that embraces the "me-first", animal impulse paradigm for society. The Gilligan Principle is a must read for those interested in both the technical problems that sharply challenge the random accident explanation for life, as well as the alarming rise in social dysfunction now tearing our societies apart, and which now threatens to push modern civilization to a very dark end.
