This edited volume presents research results of the PPP European Green Vehicle Initiative (EGVI), focusing on Electric Vehicle Systems Architecture and Standardization Needs. The objectives of energy efficiency and zero emissions in road transportation imply a paradigm shift in the concept of the automobile regarding design, materials, and propulsion technology. A redesign of the electric and electronic architecture provides in many aspects additional potential for reaching these goals. At the same time, standardization within a broad range of features, components and systems is a key enabling factor for a successful market entry of the electric vehicle (EV). It would lower production cost, increase interoperability and compatibilities, and sustain market penetration. Hence, novel architectures and testing concepts and standardization approaches for the EV have been the topic of an expert workshop of the European Green Vehicles Initiative PPP. This book contains the contributions of current European research projects on EV architecture and an expert view on the status of EV standardization. The target audience primarily comprises researchers and experts in the field.

This is one in a series of manuals for car or motorcycle owners. Each book provides

information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state-of-the-art, this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on the steady state and dynamic operation of electricity grids, identifies strategies to mitigate them and the possibility to support simultaneously large-scale integration of renewable energy sources. New business models and control management architectures, as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally, regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES-UETP umbrella in 2010 and 2011, this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

The award-winning author of *23 Things They Don't Tell You About Capitalism* outlines the real-world processes of the global economy while explaining how to better understand the strengths and weaknesses of key economics theories to better navigate today's interconnected world.

Transportation plays a substantial role in the modern world; it provides tremendous benefits to society, but it also imposes significant economic, social and environmental costs. Sustainable transport planning requires integrating environmental, social, and economic factors in order to develop optimal solutions to our many pressing issues, especially carbon emissions and climate change. This essential multi-authored work reflects a new sustainable transportation planning paradigm. It explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility management solutions to transportation problems. This text reflects a fundamental change in transportation decision making. It focuses on accessibility rather than mobility, emphasizes the need to expand the range of options and impacts considered in analysis, and provides practical tools to allow planners, policy makers and the general public to determine the best solution to the transportation problems facing a community. Featuring extensive international examples and case-studies, textboxes, graphics, recommended reading and end of chapter questions, the authors draw on considerable teaching and researching experience to present an essential, ground-breaking and authoritative text on sustainable transport. Students of various disciplines, planners, policymakers and concerned citizens will find many of its provocative ideas and approaches of considerable value as they engage in the processes of understanding and changing transportation towards greater sustainability.

'Beautifully put-together with wonderfully crafted, full-on flavour recipes for everyone. A proper family feast of a cookbook!' Tom Kerridge □ 'This is a gorgeous book.' Nigella Lawson □ Lennie

and Jessie are as madly entertaining to read as they are to be around. They are also brilliant storytellers so every recipe is as personal as it could be: a classic Jewish chopped liver served on Friday night dinners, aromatic Beef Stifado eaten on Greek holidays or an orange and pistachio cake created by son and brother. I adore this family. Yotam Ottolenghi 'This book encapsulates humour, kindness, bucket loads of love and, most importantly, good food. I'm so happy to have the Ware family in my life and in my kitchen.' Sam Smith 'Mum. Guess what?' 'What Jessie?' 'We've written a cookbook.' 'I know darling! Do you think anyone will want to buy it?' 'Well, it's the recipes we've made our guests - the really good ones. Like the Sausage and Bean Casserole we made Ed Sheeran, the Drunken Crouton and Kale Salad we made Yotam Ottolenghi and the two Blackberry and Custard Tarts we served Nigella.' 'You ate a whole one before she arrived, darling.' 'It's a bloody good recipe mum.' Cooking through Table Manners is like having Jessie and Lennie at the table with you: brash, funny and full of opinions. In true Ware style, their cookbook is divided into Effortless, A Bit More Effort, Summertime, Desserts and Baking (thanks to Jessie's brother Alex), Chrismukkah (Christmas, Hanukkah and celebrations) and, of course, Jewish-ish Food. These delicious, easy dishes are designed for real people with busy and sometimes chaotic lives with the ultimate goal of everyone eating together so unfiltered chat can flourish.
