Explore volcanic rocks, shiny gemstones, colorful minerals, ancient marble, and fallen meteorites and find out how they all came to be. From rough rocks to glittering crystals and everything in between, this stunning collection of facts and photos leaves no stone unturned. Did you know that every rock is a combination of one or more minerals? And that marble was first used in ancient Greece but still forms deep underground as you read this? Or that vibrant paints can be made from minerals, while some precious metals can grow in twisting shapes? Almost 20,000 meteorites land on our planet every year, but what does a space rock actually look like? Find out how to spot minerals and fossils, discover how crystals grow, and what you need to start your own collection. Part of the best-selling Eyewitness series, which is now getting an exciting makeover, this popular title has been reinvigorated for the next generation of information-seekers and stay-at-home explorers. New photography makes the rocks and minerals pop, revealing their color and texture, while the text gives all the facts and data to turn budding rock collectors into experts.

Engage scientists in grades 4D6 and prepare them for standardized tests using Just the Facts: Earth and Space Science. This 128-page book covers concepts including rocks and minerals, weathering, fossils, plate tectonics, earthquakes and volcanoes. Other topics include oceans, the atmosphere, weather and climate, humans and the environment, and the solar system. It includes activities that build science vocabulary and understanding, such as crosswords, word searches, graphing, creative writing, vocabulary puzzles, and analysis. An answer key and a standards matrix are also included. This book supports National Science Education Standards and aligns with state, national, and Canadian provincial standards.

Student activities help children learn how rocks are formed.
