Incorporate the Benefits of Activity-Based Costing into the Efficiencies of Your SAP R/3 System Given SAP's dominance in the enterprise resource planning (ERP) market, many companies and their managers encounter SAP AG applications in some form or another. Many of these organizations have recognized the value of utilizing Activity-Based Costing/Management concepts to perform more accurate cost assignments or drive performance initiatives. Managers are then faced with trying to determine how Activity-Based Costing can be incorporated into the SAP environment. The 123s of ABC in SAP is the first book of its kind designed to help business managers understand the capabilities of the SAP R/3 business application to support Activity-Based Costing, Management, and Budgeting. Divided into three parts—the conceptual foundation, the capabilities of SAP ABC, and integration with other tools—the book provides readers with the following: An explanation of how Activity-Based Costing can be used with SAP Helpful hints for implementing ABC into SAP Insights into the most common difficulties and potential solutions when implementing ABC into SAP Summary tables that highlight key decisions to be made, implementation hints, and organizational challenges Detailed descriptions of SAP software applications to support the Activity-Based Costing approach as well as the integration of SAP R/3 with Oros software Examples of the tandem usage of Resource Consumption Accounting with Activity-Based Costing

This book is written keeping in mind the students of SAP production planning, Engineering undergraduates, Management graduates and working professionals. For lucid understanding of concepts to the readers, extensive use of screenshots has been made in the book. The book begins with explaining organizational structure, not only the elements important from PP point of view, but also those important from MM and SD point of view. After organizational structure, an entire chapter has been dedicated to configurations required to setup master data, order type and processes for production planning in discrete industry. Consultants often face some specific issues while creating certain master data or executing certain processes, this book also discusses solution to such issues. This book introduces you with the concept of MRP and essential configuration required for setting up MRP in SAP system. You will also be guided through two important production strategies - Make-to-stock and Make-to-

order - showing you both end-to-end scenarios in discrete manufacturing with the help of screenshots. Furthermore, two important types of quality inspection scenarios - Inprocess Inspection and Final Inspection - have been shown along with quality management master data setup. The last chapter is a very important chapter based on ASAP methodology of SAP implementation providing you guidance through each phase of implementation and equipping you with a good understanding of business processes and requirements. Thus this book brings you a knowledge bank covering diverse topics from configurations and production processes to quality management integration to implementation project.
