MANHATTAN IS UNDER NEW MANAGEMENT. THEY'RE NOT FROM AROUND HERE.

Welcome to the Big Apple, son. Welcome to the city that never sleeps: invaded by monstrous fusions of meat and machinery, defended by a private army that makes Blackwater look like the Red Cross, ravaged by a disfiguring plague that gifts its victims with religious rapture while it eats them alive. You've been thrown into this meat grinder without warning, without preparation, without a clue. Your whole squad was mowed down the moment they stepped onto the battlefield. And the chorus of voices whispering in your head keeps saying that all of this is on you: that you and you alone might be able to turn the whole thing around if you only knew what the hell was going on. You'd like to help. Really you would. But it's not just the aliens that are gunning for you. Your own kind hunts you as a traitor, and your job might be a bit easier if you didn't have the sneaking suspicion they could be right. . . .

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

ferries crossed Narragansett Bay's East Passage. That all changed on June 28, 1969, the day the Newport Bridge opened, and it closed the last remaining gap between Aquidneck and Conanicut Islands. Proponents of the bridge persevered political squabbles and delays for twenty-five years following World War II to make it a reality. The longest suspension bridge in the region incorporated several new technologies and construction techniques and changed the face of Rhode Island. Author James Ricci details the trials and tribulations that produced an iconic bridge.
