Love is a lesson learned over lifetimes. Spanning three generations, Daisies is a stirring debut novel from a singular talent. In 1954, awkward Gwen Hisel falls in love with the affable Willie Bennett on the dusty Oklahoma prairie. What follows is a harsh life for the two youngsters as they struggle to make the best of their difficult circumstances. Twenty years later, Sheila Hisel, daughter of Gwen and Willie, marries Darrel McAllister. But while her parents' love for one another had seen them through tribulation and adversity, Sheila's own marriage crumbles under the strain of hard times. Now, if Sheila's son, Lonnie, ever wants to succeed in love, he must unravel the mysteries of two very different relationships to discover the secret to true happiness.

Maid for the Billionaire (Book 1) (Legacy Collection) Dominic Corisi knew instantly that Abigail Dartley was just the distraction he was looking for, especially since having her took a bit more persuading than he was used to. So when business forces him to fly to China, he decides to take her with him, but on his terms. No promises. No complications. Just sex. Abby has always been the responsible one. She doesn't believe in taking risks; especially when it comes to men - until she meets Dominic. He's both infuriating and intoxicating, a heady combination. Their trip to China revives a long forgotten side of Abby, but also reveals a threat to bring down Dominic's company. With no time to explain her actions, Abby must either influence the outcome of his latest venture and save his company or accept her role as his mistress and leave his fate to chance. Does she love him enough to risk losing him for good? For love or Legacy (Book 2) (Legacy Collection) (Now available) Nicole Corisi will lose her inheritance if she doesn't find a way around the terms of her father's will, but she will have to partner up with her estranged brother's rival to do it. As pretense becomes painfully real, Nicole will have to choose between Stephan or the family he is driven to destroy. Stephan Andrade has been planning his revenge ever since Dominic Corisi unscrupulously took over his father's company. With Corisi Enterprises gambling its reputation on the success of a new software network for China, Stephan finally has his chance to take back his legacy. Dominic's younger sister, Nicole, asks Stephan for his help and provides him with an opportunity to exact his revenge on a personal level. It all goes smoothly until he falls in love. Bedding the Billionaire (Book 3) (Legacy Collection) (Coming Summer 2012) Lil Dartley's life is upside down. Her previously steadfast and predictable sister is marrying an influential billionaire and needs help planning the wedding of the century in less than a month. Years of middle class rebellion have not prepared Lil for handling diplomats or paparazzi. Jake Walton knows a train wreck when he sees one. Lil was trouble from the first day he met her, but since her sister is marrying his best friend, he has no choice but to help her or this wedding will be in the news for all the wrong reasons. Teaching Lil how to fit into high society would be a whole lot easier if she didn't drive him insane both in and out of the bedroom. Saving the Sheik (Book 4) (Just because I love romances with Sheiks--coming next year)

"How do I know I covered all the requirements? Where do I begin? When should I stop? Did I miss something that will result in unpleasant surprises down the road?" If you are a Business Analyst, these questions will certainly mean something to you. You've probably asked yourself these questions at one point or another when you were assigned your early requirements development tasks. In this book, I introduce a requirements development roadmap that will guide you from start to finish. It is a plan carefully prepared and organized around consecutive stations. At each station, I tell you:

1. The target objective, and why you need to think about that particular objective at that specific point in time
2. Which elicitation techniques will best serve the objective, and which questions to ask in order to capture the information you need
3. Which analysis tools to apply in order to analyze the information from different angles
4. How to document the output of the exercise that you just performed
