A friendly, hands-on training manual and reference for lighting technicians in motion picture and television production, this handbook is the most comprehensive guide to set lighting available. It provides a unique combination of practical detail with a big-picture understanding of lighting, technology, safety, and professionalism, essential to anyone doing motion picture lighting. The fifth edition delves into every aspect of lighting and features vastly expanded sections on controlling LED lights, color science, lighting control systems, wireless systems, Ethernet-based control systems, battery power, and modern set protocol for productions small and large. With a generous number of original images, the book illustrates the use of soft light, the effect of lighting angles, and how the gaffer and DP build an effective lighting plan around the blocking of the actors. This encyclopedic volume of technical knowhow is tempered with years of practical experience and a much-needed sense of humor. This is the ideal text for professional lighting technicians across film and television including lighting directors, gaffers, DOPs, and rigging crews, as well as film and television production students studying lighting, camera techniques, film production, and cinematography. It includes a revamped companion website with supplementary resources, forms, checklists, and images.

The sky was a bright shade of blue on the first day of university and Ritsuki Ban hopes for a fresh start. As mysterious past regrets continue to linger in his mind, Ritsuki collides into a man who takes on an immediate interest in Ritsuki's looks- a man whom he later discovers, is one of his new professors! The confident Professor Takagi does nothing to hide his feelings towards Ritsuki; however the reclusive Ritsuki refuses to become teacher's pet. As Ritsuki and Takagi find themselves sky gazing together one day, they are moved by each others expressions and begin to find out more about each other. Will Ritsuki be able to drop his troubles and fall for the popular, much-loved Professor? Will Professor Takagi ever realize that Ritsuki just wants to be left alone? A love for the sky links together these two seemingly different personalities in this much anticipated first original manga by Shirow Yamada.

Insurance Coverage of Intellectual Property Assets. Second Edition is the best resource to comprehensively analyze the insurance protection issues that must be considered when an intellectual property dispute arises. From determining the scope of coverage under a policy, to tendering of a claim, to seeking remedies when coverage has been denied, this essential guidebook details the interactions among policyholders, insurers and the courts. You'll find comprehensive and timely analysis of federal and state case law and major commercial insurance policy provisions that address: The extent of insurance coverage under the andquotadvertising injurysandquot; and andquotpersonal injuryandquot; provisions Language in policies that limits or excludes coverage for intellectual property claims Public policy exclusions to coverage for claims of an infringement undertaken with intent to harm Interpreting ambiguous language in insurance policies Defending a claim under a andquotreservation of rightsandquot; and potential conflicts of interest triggered thereby Forum selection and choice of law And more. In addition, there's detailed discussion and comparison of the actual language used in most commercial insurance policies and the most recent Insurance Services (ISO) policies.
