Essentials of Financial Management is a paperback edition of an Open Access e-textbook suitable for students with limited knowledge of finance and financial markets. It answers the main questions of a corporate entity, such as how businesses finance their activities, how they select projects to invest in, the distribution of net cash flow and, of increasing importance, how businesses manage price risk relating to cost of goods sold or a decline in revenue. In providing invaluable guidance to finance, management and business students, Essentials of Financial Management employs two main philosophies: that finance is a real-life subject and that finance is a numerical subject, which is why this brilliant e-textbook contains real world examples as well as numerous Excel spreadsheet solutions for students to download and use.

ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA – with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.
