This book is a complete guide to using the Sony Cyber-shot DSC-RX100 IV camera, one of the most advanced, but still pocketable, cameras available. With this book, author Alexander White provides users of the RX100 IV with a manual covering all aspects of the camera's operation. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to accomplish things with the RX100 IV, and explains when and why to use the camera's many features. The book provides details about the camera's shooting modes as well as its menu options for shooting, playback, setup, and special effects. The book covers all of the features of the RX100 IV that are new for this model, including its electronic shutter, faster continuous shooting, 4K video recording, and ability to shoot video at up to 960 frames per second for super slow-motion playback. The book includes more than 450 color photographs that illustrate the camera's controls, display screens, and menus. The images also provide examples of photographs taken using the RX100 IV's Scene mode, with settings optimized for subjects such as landscapes, sunsets, portraits, and action shots; and the Creative Style and Picture Effect menu options, with settings for altering the appearance of images. The book also provides introductions to topics such as street photography, astrophotography, and digiscoping. The book includes a full discussion of the video features of the RX100 IV, which can shoot HD and 4K (ultra-HD) movies, and which offers manual control of exposure and focus during movie recording. The book also explains the camera's numerous features that are oriented for professional-level videography, including Picture Profiles that allow adjustment of settings such as gamma curve, black level, knee, and detail. The book provides detailed information about recording 4K video to an external video recorder using the "clean" video output from the camera's HDMI port. In three appendices, the book discusses accessories for the RX100 IV, including cases, power sources, grips, and filter adapters, and includes a list of websites and other resources for further information. The book includes an appendix with "quick tips" on how to take advantage of the camera's features in the most efficient ways possible. This guide to the RX100 IV includes a detailed index, so the reader can quickly find needed information about any particular feature or aspect of the camera.

This textbook discusses the most important theories of internationalization, including Product Life-Cycle, Internalization, Location, Eclectic Paradigm, Uppsala, Network, and International New Venture concepts. These models are grounded to a considerable extent in the Transaction Cost Theory and the Resource-Based View as explained and illustrated in the book. Relevant market entry strategies, such as franchising, contract manufacturing, joint ventures, and others are explained and categorized in light of crucial determinants of international business decision making: hierarchical control of operations, the firm's proximity to the foreign market, the investment risk, and the factor of time. What makes this textbook novel and unique? Its framework combines theories and market entry strategies: each topic is applied to authoritative, real-life business case studies. Complex issues are explained in a manner that results in understanding. Various illustrations and tables help the reader comprehend the point being discussed. The case study focus on Asian firms delivers interesting insights into modern high-technology industries and changing global business dynamics. Market Entry Strategies serves as a vital source for internationally oriented bachelor, master, and MBA programs with strategy, marketing, and management lecture modules. Consequently, this publication is highly recommended for students and scholars; but it is also useful for business practitioners seeking to gain competitive advantages in international business. About the Author Mario Glowik teaches Bachelor, MBA and Master courses in Strategic management, International management, Strategic management in China and Europe, and International and Asian business at Berlin School of Economics and Law in Berlin.
