HQRP® AC Adapter is compact and lightweight, allowing it to be stored away easily and conveniently for travel. BRAND NEW, HIGH QUALITY item ! ! ! 200 days WARRANTY !

Echolocation has evolved in different groups of animals, from bats and cetaceans to birds and humans, and enables localization and tracking of objects in a dynamic environment, where light levels may be very low or absent. Nature has shaped echolocation, an active sense that engages audiomotor feedback systems, which operates in diverse environments and situations. Echolocation production and perception vary across species, and signals are often adapted to the environment and task. In the last several decades, researchers have been studying the echolocation behavior of animals, both in the air and underwater, using different methodologies and perspectives. The result of these studies has led to rich knowledge on sound production mechanisms, directionality of the sound beam, signal design, echo reception and perception. Active control over echolocation signal production and the mechanisms for echo processing ultimately provide animals with an echoic scene or image of their surroundings. Sonar signal features directly influence the information available for the echolocating animal to perceive images of its environment. In many echolocating animals, the information processed through echoes elicits a reaction in motor systems, including adjustments in subsequent echolocation signals. We are interested in understanding how echolocating animals deal with different environments (e.g. clutter, light levels), tasks, distance to targets or objects, different prey types or other food sources, presence of conspecifics or certain predators, ambient and anthropogenic noise. In recent years, some researchers have presented new data on the origins of echolocation, which can provide a hint of its evolution. Theoreticians have addressed several issues that bear on echolocation systems, such as frequency or time resolution, target localization and beam-forming mechanisms. In this Research Topic we compiled recent work that elucidates how echolocation - from sound production, through echolocation signals to perception- has been shaped by nature functioning in different environments and situations. We strongly encouraged comparative approaches that would deepen our understanding of the processes comprising this active sense.

In today's technological age, computer literacy is important for everyone, and now learning the basics is easier than ever. A Computer Concepts Text Focused on Today's Student! Technology in Action engages students by combining a unique teaching approach with rich companion media. The sixth edition has been updated to reflect the latest developments in computer technology. New interactive learning tools have also been added to enhance student engagement. Why Computers Matter to You: Becoming Computer Literate; The History of the PC; Looking at Computers: Understanding the Parts; Using the Internet; Ethics; Application Software: Programs That Let You Work and Play; Using System Software: The Operating System, Utility Programs, and File Management; Understanding and Assessing Hardware; Networking and Security; Hackers and Viruses; Protecting Your Computer and Backing Up Your Data; Mobile Computing; Digital Entertainment; System Hardware With an array of fun and engaging learning tools, Technology in Action teaches students computer fundamentals, from learning Microsoft Office to setting up their own home network.

This volume presents the proceedings of the CLAIB 2011, held in the Palacio de las Convenciones in Havana, Cuba, from 16 to 21 May 2011. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies and bringing together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth.
