The Charles Bargue and Jean-Léon Gérôme drawing course was originally published by Goupil & Cie between 1866-1871 and consisted of 187 individual lithographs meant for copying by students at atelier art schools. Many famous artists copied from these plates as part of their art studies including Picasso, Van Gogh, and John Singer Sargent. This books includes 130 illustrations from parts I and III of the drawing course.

A comprehensive guide to drawing human beings accurately includes in-depth chapters covering proportion, structure, and posture, along with close studies of hands, feet, faces, and limbs.

Since it was first published in 1964, Professor Gottfried Bammes' *Die Gestalt des Menschen* has been considered the definitive book for artists learning to draw the human form. Deconstructing the body into its smallest components, Bammes asserts the importance of learning the structure of bones, muscles and parts in order to accurately draw a human figure. Whilst the original German has been sought after in the English speaking world, a translation has been long lamented. Now, for the first time, Bammes' most famous work has been translated by Search Press into the English language. Faithfully reproduced in translation, with over 540 original diagrams, drawings and photographs, and spanning over 500 pages, new and experienced artists can finally drink in the vast knowledge lovingly presented by the late professor.

A hands-on guide to perspective provides exercises designed to make drawing perspective effortless and easy.

An anatomy book for artists to help understand the works of George B. Bridgman with a variety of techniques and approaches. Created by Jeffrey R. Watts.

All 80 of the great 18th-century descriptive anatomist's original copperplate engravings, containing over 230 individual illustrations, of the muscles and bones

of the human body are rendered individually and in related groups from varying perspectives.

Documentation of compliance with the legislation is a corner stone in the control of food contact materials (FCM). In-house control is an important pre-requisite to limit contamination from FCM and shall be based on the declaration of compliance and supporting documentation at the responsible business operators in the supply chain. The goal of this project was to develop a Nordic checklist on documentation of compliance for FCM. The Nordic checklist contains several templates. The different templates provide check points on the minimum requirements for a declaration of compliance for all types of materials. The templates are meant to be used by industry and trade as guidance for drafting a declaration of compliance. Furthermore, the check lists are also meant to be tools for the public food and FCM inspection.

Written by a well-known artist and expert instructor, *The Figurative Artist's Handbook* offers a comprehensive, contemporary approach to the subject that instructs artists on the foundation basics and advanced techniques they need for successful figure drawing and painting. In addition to Zeller's stunning drawings and paintings, the work of over 50 of today's top practicing artists is included, so that the book will do double-duty as a hard-working how-to book and a visual treasure trove of some of the finest figurative art being created today. A must-have reference book for today's figurative artists and art students. This handbook combines three schools of thought regarding figure drawing that are, at least on the surface, at odds with each other. But with his vast teaching experience, Zeller has seen that on a deeper level they are very compatible. Such a synthesis leads to a more complete understanding of the figure. Although this comprehensive approach is reflected in contemporary art and art education, no book has ever combined all three before.

- Gestural-** The dynamic, gestural, rhythmic understanding of the figure as practiced by the great Mannerists of the Renaissance. This philosophy emphasizes life and rhythm in the human form. Rooted in the 16th and 17th centuries.
- Structural-** A solid architectural understanding of the structure and anatomy of the body as the basis for building solid figure drawings. Rooted in the 20th and 21st centuries.
- Atelier Method-** A beautiful, careful, detailed understanding of surface morphology of the figure. Smooth surface rendering. Very sensual. Rooted in the 18th and 19th centuries.
