On Swahili sayings, their meaning and usage.

The stories in this remarkable collection—including "An Anxious Man," winner of the National Short Story Prize (UK)—are vibrant and gripping. James Lasdun's great gift is his unfailing psychological instinct for the vertiginous moments when the essence of a life discloses itself. With forensic skill he exposes his characters' hidden desires and fears, drawing back the folds of their familiar self-delusions, their images of themselves, their habits and routines, to reveal their interior lives with brilliant clarity. In sharply evoked settings that range from the wilds of Northern Greece to the beaches of Cape Cod, these intensely dramatic tales in It's Beginning to Hurt chart the metamorphoses of their characters as they fall prey to the full range of human passions. They rise to unexpected heights of decency or stumble into comic or tragic folly. They throw themselves open to lust, longing, and paranoia—always recognizably mirrors of our own conflicted selves. As James Wood has written, "James Lasdun seems to be one of the secret gardens of English writing . . . When we read him we know what language is for again." This collection of haunting, richly humane pieces is further proof of the powers of an enormously inventive writer.

Set in the Ibo heartland of eastern Nigeria, one of Africa's best-known writers describes the conflict between old and new in its most poignant aspect--the personal struggle between father and son.

The first decades of the twentieth century were years of dramatic change in Zanzibar, a time when the social, economic, and political lives of island residents were in incredible flux, framed by the abolition

of slavery, the introduction of colonialism, and a tide of urban migration. Pastimes and Politics explores the era from the perspective of the urban poor, highlighting the numerous and varied ways that recently freed slaves and other immigrants to town struggled to improve their individual and collective lives and to create a sense of community within this new environment. In this study Laura Fair explores a range of cultural and social practices that gave expression to slaves' ideas of emancipation, as well as how such ideas and practices were gendered. Pastimes and Politics examines the ways in which various cultural practices, including taarab music, dress, football, ethnicity, and sexuality, changed during the early twentieth century in relation to islanders' changing social and political identities. Professor Fair argues that cultural changes were not merely reflections of social and political transformations. Rather, leisure and popular culture were critical practices through which the colonized and former slaves transformed themselves and the society in which they lived. Methodologically innovative and clearly written, Pastimes and Politics is accessible to specialists and general readers alike. It is a book that should find wide use in courses on African history, urbanization, popular culture, gender studies, or emancipation.

The study of narrative—the object of the rapidly growing discipline of narratology—has been traditionally concerned with the fictional narratives of literature, such as novels or short stories. But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual. In this volume, which provides a companion piece to Tobias Klauk and Tilmann Köppe's *Fiktionalität: Ein interdisziplinäres Handbuch*, the use of narrative to convey true and reliable information is systematically explored across media, cultures and disciplines, as well as in its narratological, stylistic, philosophical, and rhetorical dimensions. At a time when the notion of truth has come under attack, it is imperative to reaffirm the commitment to facts of certain types of narrative, and to examine critically the foundations of this commitment. But because it takes a background for a figure to emerge clearly, this book will also explore nonfactual types of narratives, thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology.

Reprint of the original, first published in 1870.

In the most renowned novel by English author Lewis Carroll, restless young Alice literally stumbles into adventure when she follows the hurried, time-obsessed White Rabbit down a hole and into a fantastical realm where animals are quite verbose, logic is in short supply, and royalty tends to be exceedingly unpleasant. Each playfully engaging chapter presents absurd scenarios involving an unforgettable cast of characters, including the grinning Cheshire Cat and the short-tempered Queen of Hearts, and every stop on Alice's peculiar journey is marked by sharp social satire and wondrously witty wordplay.
