Extensive individual and collaborative exercises expose students to different kinds of technical writing problems and solutions. Annotated student examples—more than 100 in all—illustrate different writing styles and approaches to problems. Numerous short and long examples throughout the text demonstrate solutions for handling writing assignments in current career situations. The four-color artwork in the chapter on creating visuals keeps pace with contemporary workplace capabilities. The Ninth Edition offers many new examples, exercises, samples, and articles, the latest information on using electronic resumes and documenting electronic sources, more on group work, and new Ethics and Globalization sidebars that highlight these two important topics in the technical communication field. Chapter exercises have been labeled to guide students in various goals: You create, You analyze, You revise, and Group. In this revision, the authors have focused on streamlining and updating key chapters, rather than on substantially changing the text's effective organization. Chapter 1: Definition of Technical Writing has been thoroughly revised to include complete sections on ethics and globalization. Theoretical sections have been updated to include current thinking about the role of communication between people. New exercises and examples are included. Chapter 2: Profiling Audiences, has been completely revised to feature current thinking about defining audiences, including an emphasis on the tasks that audiences must perform after reading, and a section on creating audience profiles. Worksheets have been revised, and a section on meeting quality benchmarks has been added. Chapter 3: The Technical Writing Process, substantially updated, offers a current description of the document creation process and includes recent thinking on information design. Chapter 6: Designing Pages, has been revised and simplified to make the complex process of page design easier for students to grasp. Chapter 12: Memorandums and Informal Reports, heavily revised, now includes more emphasis on, and new examples of, the IMRD report format. The chapter also includes a focus section with an expanded treatment of email. Chapter 15: Recommendation and Feasibility Reports presents a new feasibility report created by a small business to determine whether or not to market an item. Chapter 18: Oral Presentations now focuses on PowerPoint. The theory of oral reports is expanded to include recent criticisms of PowerPoint presentations and advice on creating effective presentations. Appendixes include A Brief Handbook (Appendix A), focusing on the sentence, punctuation, and mechanics issues most relevant to technical writing; and Documenting Sources (Appendix B), covering the most up-to-date APA and MLA methods for documenting print and electronic sources. The text-specific instructor web site features such resources as sample syllabi, a transition guide, an assessment guide, and chapter-by-chapter teaching suggestions. The student site offers additional student samples (including web sites built by their peers), cha

This book is based on, and expanded from, a course on technical report writing that the author has presented for over 20 years. Are you an engineer who writes technical reports as part of your job, yet you wish you could make them shorter and better - and write them faster? Maybe you write external reports for your consultancy's clients, or internal reports for senior managers. Maybe sometimes you think you signed up to be an engineer not a writer. But now you are a writer as well as an engineer and you wish that writing a good report was easier. This book will show you how to write shorter and better reports, and write them faster. The author is a retired chartered engineer and who has written about

100 articles and four books - published by Kogan Page, Macmillan and San Francisco Press. Here is just one comment from one client who arranged for the course on which this book is based to be presented to his staff: 'Thank you for the course. All the feedback I've had so far has been very positive... which is quite unusual as they can be a cynical bunch.' Well, not so much as cynical as don't like 'airy-fairy' ideas. The book is down-to-earth with practical ideas. You will learn: - How to break the task into three phases: planning, writing and editing. - How to avoid the biggest complaint about technical reports. - How to use three layers of sequencing to make the writing easier. - The most common format for technical reports - and three others. - How much detail to include. - Twelve big tips to improve the writing and several smaller tips. - How to satisfy both technical and non-technical readers. - How to cut the waffle. - How to edit your own work, which is never an easy thing to do. - Seventeen consistency checks to look for when editing. - How to get the best from the Microsoft grammar checker. - How to use the readability statistics. - Variations between British and US English. PLUS: A style guide with over 130 items of guidance, including all the punctuation marks. Did you know that the hyphen has been described as the punctuation mark to drive you mad?

Technical Reports are usually written according to general standards, corporate - sign standards of the current university or company, logical rules and practical - periences. These rules are not known well enough among engineers. There are many books that give general advice in writing. This book is specialised in how to write Technical Reports and addresses not only engineers, but also natural sci- th tists, computer scientists, etc. It is based on the 6 edition published in 2008 by st Vieweg in German and is now published as 1 edition by Springer in English. Both authors of the German edition have long experience in educating en- neers at the University of Applied Sciences Hannover. They have held many I- tures where students had to write reports and took notes about all positive and negative examples that occurred in design reports, lab work reports, and in theses. Prof. Dr. Lutz Hering has worked for VOLKSWAGEN and DAIMLER and then changed to the University of Applied Sciences Hannover where he worked from 1974 until 2000. He held lectures on Technical Drawing, Construction and Design, CAD and Materials Science. Dr. Heike Hering worked nine years as a Technical Writer and was responsible for many CAD manuals in German and English. She is now employed at TÜV NORD Akademie, where she is responsible for E-Learning projects, technical documentation and software training and supervises students who are writing their theses. Prof. Dr. -Ing.

Annotation An engineer with experience in the automotive and chemical process industries, Budinski has compiled material he used to train new engineers and technicians in an attempt to get his co-workers to document their work in a reasonable manner. He does not focus on the mechanics of the English language, but on the types of documents that an average technical person will encounter in business, government, or industry. He also thinks that students with no technical background should be able to benefit from the tutorial. c. Book News Inc

New to this edition: Up-to-date information on on-line research and computer resources. A unique four-way access system enables users of the Handbook of Technical Writing to find what they need quickly and get on with the job of writing: 1.
