In twenty short books, Penguin brings you the classics of the environmental movement. With honesty, passion and heart, Terry Tempest Williams's essays explore the impact of nuclear testing, the vital importance of environmental legislation, and the guiding spirit of conservation. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a

movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Create media-rich client applications using JavaFX 9 and the Java 9 platform. Learn to create GUI-based applications for mobile devices, desktop PCs, and even the web. Incorporate media such as audio and video into your applications. Interface with hardware devices such as Arduino and Leap Motion. Respond to gesture control through devices such as the Leap Motion Controller. Take advantage of the new HTTP2 API to make RESTful web requests and WebSockets calls. New to this edition are examples of creating stylized text and loading custom fonts, guidance for working with Scene Builder to create visual layouts, and new content on developing iOS and Android applications using Gluon mobile. The book also covers advanced topics such as custom controls, JavaFX 3D, gesture devices, printing, and animation. Best of all, the book is full of working code that you can adapt and extend to all your future projects. Is your goal to develop visually exciting applications in the Java language? Then this is the book you want at your side. JavaFX 9 by Example is chock-full of engaging, fun-to-work examples that bring you up to speed on the major facets of JavaFX 9. You'll learn to create applications that look good, are fun to use, and that take advantage of the medium to present data of all types in ways that engage the user and lead to increased productivity. The book: Has been updated with new content on modular development, new APIs, and an example using the Scene Builder tool Is filled with fun and practical code examples that you can modify and drop into your own projects Includes an example using Arduino and an accelerometer sensor to track motion in 3D Helps you create JavaFX applications for iOS and Android devices What You'll Learn Work with touch-based interfaces Interpret gesture-based events Use shapes, color, text, and UI controls to create a simple click and point game Add audio and video to your projects Utilize JavaFX 3D Create custom controls using CSS, SVG, and Canvas APIs Organize code into modules using Java Platform Module System (Project Jigsaw) Who This Book Is For Java developers developing visual and media-rich applications to run on PCs, phones, tablets, Arduino controllers, and more. Brilliant, witty, perceptive essays about fly-fishing, the natural world, and life in general by the acknowledged master of fishing writers. "In the world of fishing there are magic phrases that are guaranteed to summon the demon. Among them are: 'remote trout lake,' 'fish up to 13 pounds,' 'the place the guides fish on their days

off,'" writes John Gierach in this wonderful collection of thirteen essays inspired by a fishing trip to Rat Lake, a remote body of water in Montana. Once again John Gierach does what he does best—explain the peculiarities of the fishing life in a way that will amuse novices and seasoned fly fishers alike. The View from Rat Lake deftly examines man in nature and nature in man, the pleasures of fishing the high country, and the high and low comedy that occasionally overcomes even the best-planned fishing trip. Some typically sage observations from The View from Rat Lake: "One of the things we truly fish for [is] an occasion for self-congratulation." "In every catch-and-release fisherman's past there is an old black frying pan." "We . . . believe that a 12-inch trout caught on a dry fly is four inches longer than a 12-inch trout caught on a nymph or streamer."

This book offers a complete overview on non colorectal non neuroendocrine (NCRNNE) liver metastases and describes in detail the currently available therapies. Each chapter focuses on the treatment of metastases from a particular primary malignancy and also provides valuable information on incidence, natural history and diagnosis. NCRNNE liver metastases are rare entities compared with colorectal and neuroendocrine metastases, for which the treatments are well codified. While more publications have appeared on the topic in recent years, an in-depth study has to date been lacking. Furthermore, most published series are insufficiently comparable as they comprise patients with NCRNNE hepatic metastases from a variety of primary malignancies and consequently overlook differences in tumor behavior, frequency of isolated hepatic metastases, response to neoadjuvant or adjuvant therapy and interval between diagnosis of the primary tumor and the liver metastases. This book, with its more specific approach, will serve not only as an up-to-date guide to diagnosis and treatment but also as a reference on which to base future studies.
