“ The History of the Decline and Fall of the Roman Empire, ” by Edward Gibbon, identifies causation for the collapse of one of history ’ s greatest empires and parallels America ’ s current course of destruction.

From the middle of the second century CE, The Roman Empire faced increasing Germanic tribe infiltration along the Danubian and Rhine borders, and internal political chaos. Without efficient imperial succession, Romans in from the third century set up generals as emperors, who were quickly deposed by rival claimants. Facilitating further territorial losses to Barbarian tribes, this continued until Diocletian (r. 284-305). He and Constantine (324-337) administratively reorganized the empire, engineering an absolute monarchy. Cultivating a secluded imperial tenor, Constantine the Great patronized Christianity, particularly in his new city Constantinople, founded on the ancient site of Byzantium. Christianization, in the Hellenized and Mediterranean cities and among certain Barbarian newcomers, proceeded with imperial support, and became the state religion under Theodosius (r. 379-95).

Edward Gibbon's six-volume History of the Decline and Fall of the Roman Empire (1776-88) is among the most magnificent and ambitious narratives in European literature. Its subject is the fate of one of the world's greatest civilizations over thirteen centuries - its rulers, wars and society, and the events that led to its disastrous collapse. Here, in volumes three and four, Gibbon vividly recounts the waves of barbarian invaders under commanders such as Alaric and Attila, who overran and eventually destroyed the West. He then turns his gaze to events in the East, where even the achievements of the Byzantine emperor Justinian and the campaigns of the brilliant military leader Belisarius could not conceal the fundamental weaknesses of their empire. Through this book, Gibbon offers an explanation for the fall of the Roman Empire, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to attempt the task.

Edited, abridged, and with a critical Foreword by Hans-Friedrich Mueller Introduction by Daniel J. Boorstin Illustrations by Giovanni Battista Piranesi Edward Gibbon ' s masterpiece, which narrates the history of the Roman Empire from the second century A.D. to its collapse in the west in the fifth century and in the east in the fifteenth century, is widely considered the greatest work of history ever written. This abridgment retains the full scope of the original, but in a breadth comparable to a novel. Casual readers now have access to the full sweep of Gibbon ' s narrative, while instructors and students have a volume that can be read in a single term. This unique edition emphasizes elements ignored in all other abridgments—in particular the role of religion in the empire and the rise of Islam.

Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries.
