Yes, 3Y engines are timed at 8° BTDC. The way it's supposed to work (in print according to Toyota), you remove the vacuum connections at the vacuum advance, clamp them off, set the base timing and then... according to my interpretation of "the book", when you hook up the vacuum connections again, the timing should advance then and there.

The use of "G" to denote twin cam engines was decided on in 1971, with the renaming of the 10R into 8R-G. Before, twin cams had received new numerical codes. Note: Toyota, in 1987, began assigning dual letter engine codes to some of the "engine family" categories in some engine lines, particularly six cylinder models. This can create potential ...
