Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

Hary Turtlelove hailed Island in the Sea of Time as "one of the best time travel/alternative history stories I've ever read," and Jane Lindskold called Against the Tide of Years "another exciting and explosive tale." Now the adventures of the Nantucket islanders lost in the time of the Bronze Age continues with On the Oceans of Eternity. Ten years ago, and the twentieth century and the Bronze Age were tossed together by a mysterious Event. In the decade since, the Republic of Nantucket has worked hard to create a new future for itself, using the technological know-how retained from modern times to explore and improve conditions for the inhabitants of the past. Some of these peoples have become allies. Some have turned instead to the renegade Coast Guard officer William Walker. And for ten years, the two sides have tested each other, feinting and parrying, to decide who will be the ones to lead this brave new world into the future. Now the official battle lines have been drawn. And only one side can emerge the victor...

This is a historical critique of Henry James in relation to nineteenth-century feminism and women's fiction. Habegger has brought to light extensive new documentation on James's tangled connections with what was thought and written about women in his time. The emphasis is equally on his life and on his fictions. This is the first book to investigate his father's bizarre lifelong struggle with free love and feminism, a struggle that played a major role in shaping James. The book also shows how seriously he distorted the truth about the cousin, Minnie Temple, whose self-assertive image inspired him; and how indebted he was to certain American women writers whom he attacked in reviews but whose plots and heroines he appropriated in his own fiction.
