Concert halls all over the world feature mostly the works of German and Austrian composers as their standard repertoire: composers like the three "Bs" of classical music, Bach, Beethoven, and Brahms, all of whom are German. Over the past three centuries, many supporters of German music have even nurtured the notion that the German-speaking world possesses a peculiar strength in the cultivation of music. This book brings together seventeen contributors from the fields of musicology, ethnomusicology, history, and German literature to explore these questions: how music came to be associated with German identity, when and how Germans came to be regarded as the "people of music," and how music came to be designated "the most German of arts." Unlike previous volumes on this topic, many of which focused primarily on Wagner and Nazism, the essays here are wide-ranging and comprehensive, examining philosophy, literature, politics, and social currents as well as the creation and performance of folk music, art music, church music, jazz, rock, and pop. The result is a striking volume, adeptly addressing the complexity and variety of ways in which music insinuated itself into the German national imagination and how it has continued to play a central role in the shaping of a German identity. Contributors to this volume: Celia Applegate Doris L. Bergen Philip Bohlman Joy Haslam Calico Bruce Campbell John
