Although it is something that affects all of us, directly or indirectly, ageing can all too often be perceived negatively. Ageing and Caring is an essential, positive guide for older people, their carers and their families. It seeks to outline not only the challenges that can arise from ageing but also how active and rewarding life can continue to be in old age. From practical advice on remaining active in retirement, to guidance on coping with a loss of independence, Ageing and Caring provides advice on the complexities of ageing, covering an array of issues that older people and their carers may face: What you need to know about ageing — healthy ageing, managing your finances, and accessing health servicesCommon health problems experienced by older people, such as diabetes; sight, mobility and memory difficulties; and loneliness and depressionThe final years of life, such as moving into a nursing home, should it be required, and advance care planning Ageing and Caring underlines the importance of well-being in old age and offers practical advice on how to maintain a happy and fulfilling life, whatever the challenges.

The equation for success in chemistry is practice, practice, practice! Increase your confidence in your science skills with Practice Makes Perfect: Organic Chemistry. Inside are numerous lessons to help you better understand the subject. These lessons are accompanied by exercises to practice what you've learned, along with a complete answer key to check your work. Throughout this book you will learn the critical terms to help you understand organic chemistry, and you will expand your knowledge of the subject through dozens of sample problems and their solutions. With the lessons in this book, you will find it easier than ever to grasp concepts in organic chemistry. And with a variety of exercises for practice, you will become comfortable using your growing science skills in your classwork and on exams. You'll be on your way to mastering these topics and more: • Properties of organic compounds • Molecular geometry and isomers • Nomenclature and structure of alcohols • Reactions of carboxylic acids • Acid-base reactions • Formation of esters Offering a winning method for comprehending essentials right away, this book will become your indispensable resource for understanding the fundamentals of this science.

Taking an evidence-first big picture approach, Chemistry: Human Activity, Chemical Reactivity encourages students to think like a chemist, develop critical understanding of what chemistry is, why it is important and how chemists arrive at their discoveries. Flipping the traditional model of presenting facts and building to applications, this text begins with contexts that are real-life and matter to students – from doping in sports, to the chemistry behind the treads of wall-climbing robots. Informed by the latest chemical education research, Chemistry: Human Activity, Chemical Reactivity presents chemistry as the exciting, developing human activity that it is, rather than a body of facts, theories, and skills handed down from the past. Along with the innovative MindTap Reader and OWLv2 learning platform, this text uses unique case studies and critically acclaimed interactive e-resources to help students learn chemistry and how it is helping to address global challenges of the 21st century.

The Communications Toolkit contains practical advice, tips and strategies to enable learners to develop the communication skills needed to be successful students. The text helps students make a successful transition to tertiary studies, develop effective research skills for their discipline, approach academic writing with confidence, refine their writing skills, and enhance their face-to-face communication experience. This new edition includes more information than ever on active listening and dealing with conflict, while taking into account the changing nature of university studies as more and more students study and take courses online. New examples of online students' communication work and new coverage of the communication challenges students face when going to university via an online channel deals with this diversity. The direct, inclusive, motivational and student-friendly text addresses both individual students and those working in seminar or workshop groups, and provides activities for both types of student throughout the book. The new CourseMate Express website offers students resources for learning and revision, making this the strongest communications textbook in the market today.

"Pharmacology for Health Professionals provides a comprehensive introduction to important pharmacology principles and concepts, with a strong focus on therapeutics." "The text has been extensively updated to reflect the latest information on the clinical use of drugs, local aspects of scheduling, drug legislation and ethics." -- Book Jacket.

What is your true purpose in life? What do women really want? What makes a good lover? If you're a man reading this, you've undoubtedly asked yourself these questions but you may not have had much luck answering them. Until now. In *The Way of the Superior Man* David Deida explores the most important issues in men's lives from career and family to women and intimacy to love and spirituality to offer a practical guidebook for living a masculine life of integrity, authenticity, and freedom. Join this bestselling author and internationally renowned expert on sexual spirituality for straightforward advice, empowering skills, body practices, and more to help you realize a life of fulfillment, immediately and without compromise.

A refreshing distillation of insights into the human condition, by one of the best-known and most popular philosophers in the UK. Thinking about life, what it means and what it holds in store does not have to be a despondent experience, but rather can be enlightening and uplifting. A life truly worth living is one that is informed and considered so a degree of philosophical insight into the inevitabilities of the human condition is inherently important and such an approach will help us to deal with real personal dilemmas. This book is an accessible, lively and thought-provoking series of linked commentaries, based on A. C. Grayling's 'The Last Word' column in the *GUARDIAN*. Its aim is not to persuade readers to accept one particular philosophical point of view or theory, but to help us consider the wonderful range of insights which can be drawn from an immeasurably rich history of philosophical thought. Concepts covered include courage, love, betrayal, ambition, cruelty, wisdom, passion, beauty and death. This will be a wonderfully stimulating read and act as an invaluable guide as to what is truly important in living life, whether facing success, failure, justice, wrong, love, loss or any of the other profound experience life throws out.
